REPORT OF THE POSTMASTER GENERAL

DECEMBER 31, 1934.

To the PRESIDENT:

There is transmitted herewith the report of the Post Office Department for the fiscal year 1934, which was the first full year of the present administration of the affairs of this Department.

For the 12-month period which ended June 30, 1934, the revenues of the Post Office Department showed a decline for the fourth consecutive year.

Notwithstanding this decline, it is my pleasure to report a net operating postal surplus of \$12,161,415.03. This gratifying result has been achieved through systematic, businesslike management in the operation of the service and the exercise of strict economy wherever practicable.

A preliminary investigation made early in 1933 disclosed that expenditures for contract services, such as transportation, leases, and the purchase of supplies, as well as for personnel services, were in excess of what appeared to be justified by the greatly reduced volume of postal business.

The surplus was obtained without the dismissal of any employee because of decreasing receipts and also without impairment of the service to the public in any essential particular. On the contrary, the service, in many respects, was improved.

What has been accomplished is largely the result of efficient and loyal service on the part of both executives and employees in the

Department in Washington and in the field.

When this administration took over the operation of the Post Office Department of March 4, 1933, there was an excess of about 15,000 employees in the service. Since that time, due to resignations, deaths, retirements and removals for cause, that excess has been practically wiped out. It has been the policy of the Department not to fill vacancies thus occurring except where absolutely necessary.

The decreasing volume of mail and the excess personnel presented a serious problem. The Department was faced with the necessity of eliminating excess employees either by wholesale dismissals or by spreading employment through the means of payless furlough days during the year. The latter course was followed and only 11 payless furlough days were required. Furloughs were discontinued as soon as it became evident that there had been an upward trend in the

volume of mail and that the excess personnel had been largely reduced through retirements, deaths, resignations, and other normal causes.

On December 31, 1929, there were 254,956 persons regularly employed by the Post Office Department, which was the largest number ever carried on the Department's roll. By June 30, 1934. this number had been decreased to 229,646.

The following is a statement showing the extent of the reduction in personnel during the fiscal years 1932, 1933, and 1934:

Statement showing permanent employees in the Postal Service June 30, 1934, compared with June 30, 1933, June 30, 1932, and Dec. 31, 1929

		Number of	employee	S	Dec	rease
Class	Dec. 31, 1929	June 30, 1932	June 30, 1933	June 30, 1934 1	During 1934	During 1933 and 1934
DepartmentalPostmasters:	1, 430	1, 526	1,408	1,402	6	124
Presidential Fourth class	15, 626 33, 618	15, 487 32, 732	15, 029 32, 612	14, 110 32, 397	919 215	1, 377 335
Assistant postmasters	2, 797	2, 769	2, 698	2, 501	197	268
Clerks, first- and second-class offices	71, 966	70, 527	68, 521	64, 250	4, 271	6, 277
Watchmen, messengers, and laborers	4, 907	4, 803	4, 646	4, 459	187	344
City-delivery carriers	53, 570	52, 767	51, 229	48, 275 3, 593	2, 954	4, 492
Vehicle service Railway Mail Service	3, 835 20, 612	3, 797 21, 109	3, 737 19, 958	18, 967	991	2, 142
Rural-delivery carriers	43, 509	41, 515	39, 924	37, 019	2, 905	4, 496
All others	3, 086	3, 092	2, 909	2, 673	236	419
Total	254, 956	250, 124	242, 671	2 229, 646	13, 025	20, 478

On Oct. 31, 1934, the number of permanent employees was 229,280, not including 8,354 custodial employees transferred from the Treasury Department Oct. 1, 1933.
2 Does not include 7,990 custodial employees transferred from Treasury Department.

The Department's revenues reached their highest mark during the fiscal year 1930, when they amounted to \$705,484,098.15. Since 1930 there has been a steady decline. In 1931 the revenues declined \$49,000,000 by comparison with 1930; in 1932 there was a further decline of \$68,000,000; in 1933 there was a decline of only \$500,000, while in 1934 the loss in revenues when compared with 1933 was \$900,000. It is, therefore, obvious that the 3-cent rate for letter mail, effective July 1, 1932, was the principal factor in arresting the decline in postal revenues. However, it is also apparent that the reduction in the postage rates for local first-class mail on July 1, 1933, from 3 to 2 cents did not bring in the expected increased volume of either mail or revenue.

At the end of the fiscal year 1930, which, as stated above, brought the revenues of the Department to their highest point, the net postal deficit was \$57,571,511.72.2 In 1931 the deficit was \$98,497,891.44.2 The following year, 1932, the deficit was \$153,581,408.20,2 and in 1933 the deficit was \$48,316,005.45,2 while in 1934 there was a net postal surplus of \$12,161,415.03.

² These deficits exclude payments applying to prior years and take into account obligations for the particular year outstanding but unpaid.

In each instance these amounts of deficits and surplus were arrived at after adjustments for nonpostal items authorized by law. These nonpostal items include the air-mail subsidy, the ocean-mail subsidy, franked and penalty mail, etc.

There follows a statement showing the audited postal expenditures and revenues, the gross and net deficit or surplus of revenues for the

fiscal years 1930 to 1934:

Table showing postal revenues and expenditures and the gross and net deficiency of revenues, fiscal years 1930 to 1934, inclusive

Fiscal year	Audited expenditures	Revenues	Gross defi- ciency of revenues	Credit for nonpostal and adjusted items	Net deficit
1930	\$803, 700, 085	\$705, 484, 098	\$98, 215, 987	\$40, 644, 475	2 \$57, 571, 512
	802, 529, 573	656, 463, 383	146, 066, 190	47, 568, 299	2 98, 497, 891
	793, 722, 534	588, 171, 923	205, 550, 611	51, 969, 203	2 153, 581, 408
	700, 006, 257	587, 631, 365	112, 374, 892	64, 058, 887	2 48, 316, 005
	630, 767, 001	586, 733, 166	44, 033, 835	56, 195, 250	1 12, 161, 415

Surplus.

In 1934 the expenditures of the Department for transportation of mail, salaries of personnel, equipment and supplies, rent, heat and light, and miscellaneous obligations were \$630,767,000, as compared with \$700,006,256.53 in 1933.

The following is a statement comparing the expenditures by objects for the fiscal years 1932, 1933, and 1934:

Statement comparing the audited postal expenditures for the fiscal years 1934 and 1933, classified according to the objects of expenditure, with expenditures during the fiscal years 1933 and 1932, respectively

	Expenditures					
	1934	1933	Decrease, 1934 com- pared with 1933	1932	Decrease, 1933 com- pared with 1932	
Salaries and wages Transportation Rent, supplies, and miscellaneous_	\$431, 989, 312 125, 611, 219 31, 481, 101	\$482, 313, 358 135, 035, 471 37, 392, 482	\$50, 324, 046 9, 424, 252 5, 911, 381	\$562, 815, 338 145, 521, 489 43, 133, 497	\$80, 501, 980 10, 486, 018 5, 741, 015

1 Increase.

AIR MAIL

On July 1, 1933, air-mail contractors were being paid at the rate of approximately \$20,000,000 a year for 100 percent performance. The

²These deficits exclude payments applying to prior years and take into account obligations for the particular year outstanding but unpaid.

amount actually paid out for the year which ended June 30, 1933, was \$19,400,264.81.

The appropriation for the fiscal year 1934 was \$15,000,000, which made it necessary to readjust the service and the rates in order to keep expenditures within the appropriation. These readjustments decreased the average rate per mile of cost from 54 cents for the previous year to 42.658 cents for the fiscal year 1934.

Investigation of air-mail contracts, begun in October 1933, disclosed that these contracts were illegal, having been procured through fraud and collusion. Therefore, on February 19, 1934, all domestic air-mail contracts were annulled. In the emergency, and pending the letting of new contracts, the Army Air Corps took over the operation of the essential routes. The Army assumed this task on February 19 and continued to perform service over various routes until May 31. In the meantime the Post Office Department advertised for bids for transporting air mail on those routes served by the Army, as well as on routes not then being served by it. Later, bids were advertised for a number of other routes, completing the present Nation-wide air-mail system, which comprises a network of 28,924 miles as compared with 25,248 miles in the old system.

As a result of open, competitive bidding the average rate of pay per mile is, under the new contracts, 26.802 cents, compared with an average rate of 54 cents per airplane mile for the fiscal year 1933, and 42.658 cents immediately prior to annulment. None of the new contracts became effective until within a few weeks of the end of the fiscal year 1934. The air-mail appropriation for 1935 is \$12,000,000. The largely expanded air-mail service already contracted for and planned improvements can be provided within this figure.

The new system not only embraces 3,676 more route miles than was embraced in the old system but it serves 4 additional States and 41 cities which did not have air-mail service at the time the old contracts were annulled. Included in the increased route mileage is service which has been established between the principal islands of the Hawaiian group.

By act of Congress the air-mail postage rate was reduced, effective July 1, 1934, from 8 cents for the first ounce and 13 cents for each additional ounce to a flat rate of 6 cents per ounce. The extension of the service and the reduced postage rate has resulted in a continually increasing volume of air mail.

Air-mail legislation enacted by the last Congress has done much to eliminate objectionable conditions which obtained in the air-transport industry prior to the annulment of the contracts.

TRANSOCEANIC AIR MAIL

It is my hope that in the next Annual Report of the Department it can be stated that a trans-Pacific air-transport service will have been inaugurated by one or more American companies and that the plans looking toward a trans-Atlantic air-transport service will have been further advanced, if not consummated.

It is assumed that the Government's policy of giving financial aid to the domestic air-transport companies and American companies operating foreign air-transport service through mail contracts will be extended so as to provide Government aid for companies which inaugurate and operate transoceanic air-transport services. If such aid is to be given, the necessary funds must be provided by Congress.

I wish to call your attention to the well known fact that the governments of most of the larger countries of the world are manifesting a special interest in the development of transport lines to foreign countries, particularly transoceanic lines. With few, if any, exceptions these governments of the larger countries are providing substantial financial aid for these companies and are also providing for a considerable degree of governmental regulation and control of their affairs.

ALASKAN AIR-MAIL SERVICE

The Department has made a careful survey of transport and communications conditions in Alaska and has concluded that, from several standpoints, it is advisable for the Government to improve and extend the rather limited air-transport services now operating in the Territory. Such improvement, like the proposed transoceanic air-transport services, will require governmental aid, provision for which must be made by Congress.

POSTAGE RATES

Postage rates are still a matter of grave concern. Congress very wisely continued the 3-cent first-class postage rate until July 1, 1935. It is imperative that this 3-cent rate be continued. If the first-class postage rate were reduced from 3 to 2 cents, the result would mean a loss of at least \$75,000,000 a year in the revenues of the Post Office Department. The restoration of the 2-cent rate on local delivery letter mail effective July 1, 1933, has had the effect of reducing the revenues on that particular mail matter from \$83,702,040 in the fiscal year 1933 to \$62,545,550 in 1934, a loss in revenue of \$21,156,490.

MAINTENANCE AND OPERATION OF PUBLIC BUILDINGS

Under Executive order the administration of Government-owned post-office buildings was transferred from the Treasury to the Post

Office Department on October 1, 1933. At that time 1,569 buildings were transferred, involving an operating personnel of 7,352.

Surveys were made covering the physical condition of the buildings, the adequacy of the personnel for operation and maintenance, etc. As a result of these surveys, material savings in operation and

maintenance costs have been effected.

With the transfer of these buildings from the Treasury Department to the Post Office Department, there was charged against the revenues of the Post Office Department an expenditure of \$5,485,981.82 covering their maintenance and operation, an item which has not heretofore been included in the cost of the Postal Service. The Department felt that this was an expense properly belonging to the Postal Service.

THE FISCAL YEAR 1935

From the revenue returns for the first 4 months of the current fiscal year the Department estimates that its income for the fiscal year 1935 will be approximately \$615,000,000. This estimate is based on the continuance of existing postage rates and the gradual trend upward in postal receipts already manifested.

Expenditures for the fiscal year 1935 are estimated at \$697,092,564. This estimate includes the subsidies for air mail and ocean mail, the free mail for Congress and Government departments, etc., as well as maintenance of public buildings under the custody of the

Department.

Respectfully submitted.

JAMES A. FARLEY, Postmaster General.

LEGISLATION

ENACTMENTS BY THE SEVENTY-THIRD CONGRESS, SECOND SESSION

Laws specially affecting the Postal Service were enacted by the second session of the Seventy-third Congress, as follows:

The act approved March 27, 1934 (Public, No. 140), to authorize the Postmaster General to accept and use equipment, landing fields, men, and material of the War Department, for carrying the mails by air, and other purposes.

The act approved May 4, 1934 (Public, No. 203), to require post-masters to account for money collected on mail delivered at their

respective offices.

The act approved May 7, 1934 (Public, No. 209), to amend section 198 of the act entitled "An act to codify, revise, and amend the penal laws of the United States", approved March 4, 1909, as amended by the acts of May 18, 1916, and July 28, 1916, curbing the practice of depositing statements of account, circulars, sale bills, etc., in letter boxes established and approved by the Postmaster General for the receipt or delivery of mail matter without payment of postage thereon.

The act approved May 9, 1934 (Public, No. 214), to amend the act entitled "An act to promote the circulation of reading matter among the blind", approved April 27, 1904, and acts supplemental thereto, transmitting, free of postage, sound reproduction records for the use

of the blind.

Section 515 of the Revenue Act of 1934, approved May 10, 1934 (Public, No. 216), continued the 3-cent postage rate until July 1, 1935, and granted the President power to modify rates on all mail matter, except drop letters, until July 1, 1935.

The act approved June 5, 1934 (Public, No. 288), to fix the rates

of postage on certain periodicals exceeding 8 ounces in weight.

The act approved June 5, 1934 (Public, No. 289), to remove inequities in the law governing eligibility for promotion to the position

of Chief Clerk in the Railway Mail Service.

The act approved June 11, 1934 (Public, No. 302), to amend the third clause of section 14 of the act of March 3, 1879 (20 Stat. 359; U. S. C., title 39, sec. 226), providing that publications produced by the stencil, mimeograph, or hectograph process or in imitation of type-writing shall not be regarded as printed within the meaning of this clause.

The act approved June 12, 1934 (Public, No. 308), to revise airmail laws, and to establish a commission to make a report to the Congress recommending an aviation policy.

The joint resolution approved June 26, 1934 (Pub. Res. No. 48), to simplify the administration of air-mail routes and contracts.

The act approved June 12, 1934 (Public, No. 315), to provide for the final construction, on behalf of the United States, of postal treaties or conventions to which the United States is a party.

The act approved June 13, 1934 (Public, No. 332), to authorize the Post Office Department to hold contractors responsible in damages for the loss, rifling, damage, wrong delivery, depredation upon, or other mistreatment of mail matter due to fault or negligence of the contractor or an agent or employee thereof.

The act approved June 14, 1934 (Public, No. 349), to provide hourly rates of pay for substitute laborers in the Railway Mail Service and time credits when appointed as regular laborer.

The act approved June 14, 1934 (Public, No. 353), to reclassify terminal railway post offices.

The act approved June 15, 1934 (Public, No. 355), to authorize the acknowledgment of oaths by post-office inspectors and by Chief Clerks of the Railway Mail Service.

The act approved June 16, 1934 (Public, No. 366), to compensate the Post Office Department for the extra work caused by the payment of money orders at offices other than those on which the orders are drawn.

The act approved June 16, 1934 (Private, No. 257), granting a franking privilege to Grace G. Coolidge.

The act approved June 18, 1934 (Public, No. 385), to enable the Postmaster General to withhold commissions on false returns made by postmasters.

The act approved June 18, 1934 (Public, No. 386), to amend the act entitled "An act authorizing the Postmaster General to adjust certain claims of postmasters for loss by burglary, fire, or other unavoidable casualty", approved March 17, 1882, as amended.

The act approved June 18, 1934 (Public, No. 390), to remove the limitation upon the extension of star routes.

The act approved June 18, 1934 (Public, No. 391), to authorize the Postmaster General to charge an additional fee for effecting delivery of domestic registered, insured, or collect-on-delivery mail, the delivery of which is restricted to the addressee only, or to the addressee or order.

The act approved June 19, 1934 (Public, No. 414), to amend the act entitled "An act to amend section 217, as amended, of the act entitled 'An act to codify, revise, and amend the penal laws of the United States', approved March 4, 1909", approved January 11, 1929, with respect to the use of the mails for the shipment of certain drugs and medicines to cosmetologists and barbers.

The act approved June 19, 1934 (Public, No. 429), to amend section 3937 of the Revised Statutes, authorizing the handling of mail matter deposited in post offices without the postage being wholly paid, as dead letters.

The act approved June 22, 1934 (Public, No. 452), to authorize the Postmaster General to hire vehicles from postal employees.

The act approved June 22, 1934 (Public, No. 455), relating to conveyance of letters by private hands without compensation, or by special messenger employed for the particular occasion only.

The act approved June 22, 1934 (Public, No. 456), to amend section 392 of title 5 of the United States Code, authorizing the Postmaster General to settle claims for damages caused by negligence of postal employees.

The act approved June 25, 1934 (Public, No. 463), to adjust the salaries of rural letter carriers, and for other purposes.

The act approved June 26, 1934 (Public, No. 472), to reduce the fee to accompany applications for entry as second-class matter of publications of limited circulation.

The act approved June 27, 1934 (Public, No. 480), amending the Independent Offices Appropriation Act of 1935, providing full credit for all service rendered during the period from July 1, 1932, to June 30, 1934, by postal and other officers and employees entitled to automatic promotions.

BUREAU OF THE FIRST ASSISTANT POSTMASTER GENERAL

DIVISION OF POST OFFICE SERVICE

POST OFFICES—CLASSIFICATION

Pursuant to the requirements of the law classifying post offices and fixing the salaries of postmasters and supervisory officers in accordance with the gross receipts for the preceding calendar year, the salaries of postmasters and supervisory officers were duly adjusted, effective July 1, 1934. The detail of these adjustments insofar as they affect postmasters is set forth in the appendix. The number of offices of the presidential classes, as of July 1, 1934, as compared with the number on July 1, 1933, is as follows:

	1933	1934	Decrease
First class . Second class . Third class .	966 3, 123 10, 024	922 2, 987 9, 475	44 136 549
Total	14, 113	13, 384	729

POST-OFFICE STATIONS AND BRANCHES

Classified.—On June 30, 1934, there were 1,487 classified stations and branches in operation. These units are established and maintained primarily for the purpose of furnishing adequate postal facilities to the patrons of the neighborhood in which located.

Contract.—On June 30, 1934, there were 5,809 contract stations in operation. During the fiscal year the receipts from stamp sales from such stations were approximately \$26,725,116 and the cost for their maintenance during the same period was \$1,533,972.

Such units are conducted under agreement for a period of 2 years at a stipulated rate of compensation, ranging from \$1 to \$1,500 per annum. They are usually conducted in places of business, more frequently in drug stores and department stores. Stations in the latter places are maintained largely for the convenience of the patrons of the stores in which located.

Persons conducting contract stations are required to furnish quarters and equipment, heat, light, and the necessary clerical assistance. All stations and branch offices are required to transact money-order and registry business, sell postage supplies, and, when so designated, shall transact postal-savings business. Stations and

branch post offices may also receive and dispatch mails. At contract stations and branches, where the needs of the service require, lock boxes and general-delivery facilities are provided.

REORGANIZATION OF POST OFFICES

The Department continued its efforts to reduce the cost of service proportionately to the diminished volume of business, and effected during the year a further substantial reduction in the pay roll of clerks, carriers, and laborers by continuing the policy of not filling vacancies as they occurred through resignations, retirements, deaths, and removals.

Surveys were made at a large number of post offices, resulting in further reductions in expenditures for overtime and auxiliary clerk, carrier, and laborer hire through the readjustment of working schedules and delivery routes. Surplus regular employees, at offices still having them, were utilized wherever practicable in lieu of auxiliary service. Special attention was given also to the matter of proper supervision, with view to obtaining greater efficiency and eliminating unnecessary expenditures. More than 800 supervisory positions, as they became vacant, were absorbed without detriment to the service, making a further large reduction in operating costs.

PERSONNEL

First- and second-class post offices.—On June 30, 1934, the number of assistant postmasters, supervisors, clerks, watchmen, messengers, laborers, city and village carriers employed in post offices of the first and second classes was 120,454. During the year there was a net reduction in personnel of 4,468 assistant postmasters, supervisors, and clerks; 2,985 carriers; and 187 watchmen, messengers, and laborers—a total of 7,640.

The average basic salary of clerks, including supervisory employees, decreased from \$2,172.92 to \$2,166.93 and of city carriers from \$2,090.17 to \$2,089.52. The decreases are due to the fact that the law prohibited promotions within the several grades during the fiscal year 1934. The reduction of 15 percent in compensation required by the act of April 1, 1933, continued in effect until February 1, 1934, when it was superseded by a reduction of 10 percent for the balance of the fiscal year, as provided by the Independent Offices Appropriation Act, 1935.

The resignations of clerks during the year numbered 232, an increase of 68 as compared with the previous year. Resignations of carriers were 126, an increase of 2 over the previous year.

Third-class offices.—The Department has continued to cooperate in the effort to spread employment by directing postmasters of third-class offices where practicable not to employ members of their immediate families, thus making available many clerical positions to competent worthy unemployed persons with dependents.

OVERTIME

During the year ended June 30, 1934, expenditures for clerical overtime amounted to \$646,042, and for carrier overtime \$580,157, decreases of \$58,058 and \$65,968, respectively. These decreases were due largely to the continued efforts of the Department to restrict the use of overtime to emergencies only, and to spread the work among the substitutes.

CITY AND VILLAGE DELIVERY SERVICES

No additional city or village delivery service was established during the year. A few minor extensions of existing service were made, involving little or no expense.

RETIREMENT

During the year 5,249 post-office employees, including 2,720 supervisors, clerks and laborers and 2,529 city and village carriers were retired with annuity, making a total of 8,829 supervisors, clerks, and laborers and 10,439 carriers, or a grand total of 19,268 post-office employees retired during the period August 20, 1920, to June 30, 1934. The Department has no record of the number of annuitants who have been separated from the rolls by death or otherwise. The figures given represent an increase of 2,955 in the number of retirements of post-office employees as compared with 1933. This increase is due principally to the involuntary separation from the Service of surplus employees who were entitled to annuities under the provisions of section 8 (a) of the Independent Offices Appropriation Act, 1934, which authorizes practically maximum annuities to employees having 30 or more years of service and who have been so separated.

Under the provisions of section 204 of the act of June 30, 1932, providing for immediate retirement of employees who had reached automatic retirement age, certain employees named in Executive Order 5874 were separated from the service at close of business July 10, 1932. The Veterans' Administration began payment of annuities to these employees as of August 1, 1932, leaving them without pay or annuity for the period from July 11 to 31, inclusive. The Postmaster General recommended legislation, which was embodied in section 8 of the act of March 3, 1933, authorizing annuities for

the employees included in the Executive order to begin with the day following date of separation from active service.

It has since been found, however, that a number of employees were separated from the Service during the month of July 1932 in addition to those named in the Executive order above referred to, who have received neither pay nor annuity for the period from date of separation to July 31, 1932, inclusive.

COOPERATION

Throughout the year the Department cooperated with the National Industrial Recovery Administration by placing the facilities of the postal establishment at its service for the distribution of literature and the dissemination of information to assist in its work. Frequent notices were published in the Postal Bulletin instructing postmasters in these matters.

DIVISION OF POSTMASTERS

APPOINTMENT OF POSTMASTERS

Presidential postmasters.—Offices of the first, second, and third classes.

During the fiscal year ended June 30, 1934, there were 4,753 post-masters nominated by the President, of whom 4,698 were confirmed by the Senate. Eleven nominations were withdrawn from the Senate and one rejected, leaving but 43 nominations which failed of confirmation. From eligible registers established by the Civil Service Commission 4,153 appointments were made. There were 31 employees of the classified civil service promoted and 7 with civil-service status reinstated after satisfying the Civil Service Commission that they met the requirements for appointment. Four hundred and seventy-two postmasters were reappointed. Ten were appointed without examination due to the inability of the Civil Service Commission to establish registers. Twenty-four appointments were made in Territories and possessions, of which 11 were reappointments and 13 new appointees.

Appointments were made to fill vacancies at 2,867 offices due to the expiration of 4-year terms; 1,670 on account of death, resignation, removal, or retirement, and the establishment of new offices; 84 because of the advancement of offices from the fourth class to a Presidential grade, and 77 due to transfers to positions in the classified civil service.

Postmasters of the fourth class.—Fourth-class postmasters were commissioned at 3,092 offices during the fiscal year where vacancies occurred through death, resignation, or removal of postmasters, establishment of offices, and through relegation of offices from the Presidential classes.

RETIREMENT

On June 30, 1934, 432 postmasters and 70 acting postmasters, serving at offices of the first, second, and third classes, were entitled to the benefits of the Retirement Act.

During the fiscal year, 307 postmasters and 1 acting postmaster were separated from the service, of which number 63 were retired under section 8 of the Independent Offices Appropriation Act (30 years' or more service), 29 under section 7 of the act of May 29, 1930 (15 years' but less than 30 years' service), 16 automatically upon reaching retirement age, 8 under section 6 of the act of May 29, 1930 (total disability), 9 due to death, 5 resigned without sufficient service to receive annuity, and 82 transferred to other positions within the Service. Ninety were removed due to expiration of commissions and 5 on charges of misconduct and delinquency.

DESIGNATION OF ACTING POSTMASTERS

Existing law requires the Postmaster General to designate an acting postmaster when a vacancy occurs by death, resignation, or removal of the postmaster. It is desirable that legislation be enacted which will provide authority, in those cases where there is unavoidable delay in filling vacancies due to death, resignation, removal, or expiration of term, for the payment of the postmasters' salaries to the persons assuming charge of the post offices until acting or regular appointments of postmasters are made.

It is in the interest of the Service to have additional authority provided by legislation to appoint acting postmasters upon the expiration of postmasters' terms whose services should be terminated by reason of unsatisfactory records but without the stigma of removal against them.

DIVISION OF DEAD LETTERS AND DEAD PARCEL POST

Undelivered letters received in the dead-letter offices during the year increased 7½ percent over the number received last year.

Money found in letters during the fiscal year 1934 amounted to \$69,596.29, of which amount \$40,230.73 was restored to the rightful owners.

As the result of a thorough survey, the dead-letter service was further decentralized by establishing dead-letter branches at 966 first-class post offices for the treatment of local dead first-class matter, and the treatment at the proper central accounting offices of all dead first-class matter reaching post offices of the second, third, and fourth classes.

This reorganization became effective December 1, 1933, and effected a considerable saving in the cost of operations, as the work was wholly absorbed by regular personnel of the offices concerned. The dead-letter service to the public was made more efficient, in that the time of treatment and restoration to the sender was cut from approximately 15 days to practically a 48-hour service.

The number of unclaimed addressed parcels and articles found loose in the mails, treated in the dead parcel-post branches, decreased 84,231 from the previous year. The number of unclaimed parcels and articles sold at public auction was 194,630, and the net proceeds of these sales amounted to \$46,687.44, an increase of \$11,168.30.

The total revenue from all sources, including sales of unclaimed merchandise and magazines, money and stamps removed from undeliverable mail, found loose in the mails, and from 3-cent fees for returning dead letters amounted to \$161,104.82, an increase of \$17,674.51%. The actual cash revenues increased \$12,326.15, over the previous year.

BUREAU OF THE SECOND ASSISTANT POSTMASTER GENERAL

DIVISION OF RAILWAY MAIL SERVICE

The function of the Railway Mail Service is the supervision of the distribution and dispatch of mails in the Postal Service and the distribution of mails in transit in order to effect the earliest practicable delivery.

Curtailment and withdrawal of train service by railroad companies continued during the fiscal year 1934, but not to as large an extent as during the previous year. To provide adequate mail service for offices formerly supplied by trains, star-route service has been established, and in most cases a better service has been provided at a lower cost.

Some railroad companies have quickened schedules on through trains and this has expedited the delivery of transcontinental, or through mails.

There has been some increase in the volume of mails handled during the year but the additional mails have been transported and distributed without increased cost.

In a number of instances it has been found practicable to reduce railway post office, apartment car, and storage car space at a substantial saving in cost of mail transportation without impairing the efficiency of mail service.

Railroad companies have been experimenting with lightweight high-speed trains during the year and in a few instances such equipment has resulted in expediting the transportation and delivery of the mails.

Surveys have been made during the year of organization units and better methods adopted which have resulted in a reduction of personnel and at the same time provided improved service.

A terminal railway post office in rented quarters was moved into the railroad station at a slightly higher rental but involving a net saving to the Department of approximately \$10,000 in the trucking of mails.

The distribution of city mails was taken up on several railway post office lines which resulted in securing first instead of second carrier delivery.

PERSONNEL 1

On June 30, 1934, there were 267 officials (including 115 chief clerks and 5 vacancies and 111 assistant chief clerks and 3 vacancies);

 $^{^{1}}$ See appendix for table showing average annual salary, average annual travel allowance, and number of resignations during the year.

59 clerks in charge of sections in offices of division superintendents and 1 vacancy; 17,899 regular railway postal clerks; 815 regular laborers; 7 joint employees; 247 acting railway postal clerks; a total of 19,285 employees (including 19,038 regular and 247 acting employees); a decrease of 945 or 4.73 percent in the regular force; an increase of 76 or 44.44 percent in the acting force, or a decrease of 869 or 4.31 percent in the total number of employees as compared with the previous fiscal year.

DISTRIBUTION OF MAIL

During the year there were 9,001,063,788 distributions and redistributions of pieces of first-class mail and 5,347,631,158 distributions and redistributions of pieces of second-, third-, and fourth-class mail, a total of 14,348,694,946 distributions and redistributions of pieces, exclusive of registered mail, by railway postal clerks, a decrease of 1.31 percent in first-class mail and an increase of 1 percent in second-, third-, and fourth-class mail; a net decrease of 0.46 percent in all classes of mail over the previous year. The above figures include 90,160,598 pieces of air mail. There were also handled during the year 67,576,697 pieces of registered mail, including 1,070,779 pieces of registered air mail.

CAR EQUIPMENT 2

On June 30, 1934, there were 743 full postal cars and 3,496 apartment mail cars owned by the several railroad companies and operated for the Postal Service.

All of the 743 full postal cars and 2,449, or 70.1 percent, of the apartment cars are all-steel construction. The steel underframe apartment cars constitute 14.1 percent; wood, steel reinforced, 15.5 percent; and the straight wood cars 0.3 percent of the cars in service.

Of the 10 straight wood cars 7 are narrow gage.

A mail apartment was installed in each of two lightweight highspeed trains built during the year, and in the same period 11 steelunderframe, 52 wood steel-reinforced, and 3 wood cars were retired from the service. Twenty-six all-steel mail cars were under construction at the close of the year, 5 of which are to be operated in lightweight high-speed trains.

Despite the unfavorable conditions resulting from continued depression in railroad circles progress has continued in the standardization and improvement of existing equipment. During the year 18 cars were standardized, 1 was strengthened, 201 were equipped with sanitary fixtures, 16 were supplied with electric fans, and 33 had

electric lights installed in lieu of gas or oil.

² For table showing type of construction of postal cars see appendix.

CASUALTIES

There were 79 railroad accidents during the fiscal year in which railway postal clerks were injured or in which mail was lost or damaged, resulting in serious injuries to 25 clerks and slight injuries to 83.

STAR-ROUTE SERVICE 3

On June 30, 1934, there were 12,237 star routes, a decrease of 359 routes over the preceding year. The length of the routes aggregated 251,824.26 miles one way, requiring travel by contractors and carriers of 156,699,298.03 miles per annum. The average rate of cost per mile of scheduled travel was 8.16 cents, a decrease of 0.99 cent per mile.

The mails were carried on a pound-rate basis on 176 routes, at a cost of \$21,919.40.

As the result of the establishment or extension of rural delivery 47 star routes were discontinued. The length of the routes discontinued was 470.48 miles, and their annual cost was \$26,825.36.

Service in the Fourth Contract Section was awarded for the term of 4 years, beginning July 1, 1934, at an aggregate cost of \$4,876,765.98 per annum, a decrease in cost under the preceding term of \$1,657,451.79 per annum.

Government-operated star-route service.—This class of service, which is paid for from the appropriation for inland transportation by star routes (excepting service in Alaska), is operated only on routes for which no proposals for star-route service under contract can be obtained, or where the rates submitted in response to advertisement are considered too high and much in excess of the cost of providing service with Government-owned equipment.

On June 30, 1934, 10 such routes were in operation, having an aggregate length of 854.5 miles one way. The cost of the service for the year was approximately \$90,000. Thirty-nine employees and 29 trucks were employed in the operation of these routes.

DIVISION OF RAILWAY ADJUSTMENTS

MAIL TRANSPORTATION BY RAILROADS AND MAIL-MESSENGER SERVICE

On June 30, 1934, mails were carried under authorizations of the Department by 412 companies over 201,260 miles of railroads. The annual mileage of regularly authorized space units of the several sizes for carrying mails was 453,846,658.

The appropriation for the fiscal year for inland transportation by railroad routes and mail-messenger service was \$100,000,000. From this amount, \$6,875 was transferred to the credit of the appropriation for salaries, office of the Solicitor, for the Post Office Department,

³ For table showing number of routes and comparison of cost in the several contract sections see appendix.

and \$928,875 was transferred from the appropriation for salaries, Railway Mail Service, to the credit of this appropriation, making a net total of \$100,922,000 available. The expenditures for the fiscal year were \$100,896,153 (subject to adjustment), a decrease of

\$3.794.488 from those of the preceding year.

Of the above amount, \$7,456,913 was expended for mail-messenger service. On June 30, 1934, there were 20,943 mail-messenger routes, a decrease of 569, or 2.65 percent. The annual rate was \$7,022,831, a decrease of \$2,230,270, or 24.10 percent, in the annual cost. In the last annual report mention was made of the policy which was adopted about April 1, 1933, to issue advertisements for all mail-messenger service generally throughout the country with a view to reducing its cost. This general advertisement was concluded in December 1933. On June 30, 1934, largely as the result of these advertisements, the annual rate of expenditure had been reduced approximately \$2,464,000.

SIDE AND TRANSFER SERVICE

Under orders of the Interstate Commerce Commission the railroads are compensated for carrying the mails between railroad stations and between stations and the several post offices where so required by the Postmaster General on the basis of the cost of such service plus 3 percent. Where the Department has been able to secure this service by the establishment of mail messenger service at less cost, it has done so.

The annual rate of expenditure for this service on July 1, 1933, was \$583,450 at 3,415 points. On June 30, 1934, the annual rate was \$528,203, a reduction of 9.47 percent, and the number of points was 3,244, a reduction of 5.01 percent. The estimated expenditures were \$535,404.

MAIL TRANSPORTATION BY POWER BOATS

On June 30, 1934, mails were carried under authorizations of the Department by power boats over 219 routes, covering 38,977 miles. The appropriation for the service for the fiscal year was \$1,350,000, and the expenditures were \$1,180,840 (small part estimated).

Contracts for this service are entered into after advertisement and receipt of competitive bids. The contracts for service in the fourth contract section were relet from July 1, 1934. The cost under the expiring contracts was \$789,113 for 101 routes. The new contracts were let on 92 routes, at an aggregate annual rate of \$752,101.

MAIL TRANSPORTATION BY ELECTRIC RAILWAYS

On June 30, 1934, the mails were carried under authorizations of the Department by 153 companies over 4,824 miles of electric railways.

The appropriation for the fiscal year was \$450,000, and the expenditures (subject to adjustment), \$397,034. This service is authorized and paid for under the terms of the order of the Interstate Commerce Commission.

STAR-ROUTE SERVICE IN ALASKA

On June 30, 1934, mails were carried under authorizations of the Department on 63 routes, covering a distance of 10,216 miles. The appropriation for the service for the year was \$135,000. The estimated expenditures were \$130,021.

DIVISION OF INTERNATIONAL POSTAL SERVICE

That the International Postal Service, not unlike other branches of the Postal Service and of the Government in general, as well as private business, has been a victim since 1930 of the world-wide depression is indicated by the decrease in the volume of the mails exchanged with foreign countries as set forth in the annual reports for the fiscal years 1931, 1932, and 1933.

While there was again a decrease during this year, it is believed that the percentages of decrease are now sufficiently low in most cases to indicate quite unmistakably that the decline in international postal traffic has been arrested in our exchanges with many foreign countries, signifying a gradual improvement in foreign trade.

In analyzing the decrease by countries or groups of countries it is found that, with one exception (in connection with regular mails dispatched to countries other than Canada and Mexico), the percentages of decrease are less than in the years 1932 and 1933. In the case of regular mails dispatched to Canada and Mexico and in the case of regular mails received from foreign countries generally, the decrease was negligible, while the decrease in the total volume of parcel post dispatched to foreign countries has been almost entirely eliminated, and the percentage of decrease in the total volume of parcel post received has been greatly reduced. The exception as regards regular mails dispatched is quite noticeable in that it relates to the total volume of such mails dispatched to all foreign countries other than Canada and Mexico, the percentage of decrease in this instance being considerably greater than in 1933 although considerably less than in 1932.

The statistics indicating the increased downward trend for 1934 in the volume of regular mails dispatched to foreign countries generally were assembled as to groups of countries (other than Canada and Mexico) and they do not admit of sufficient analysis to determine definitely the countries to which such dispatches showed the greatest decreases and which therefore were responsible for the increased percentage as a whole. That our regular mail dispatches to the countries of Central and South American were not responsible is indicated by separate statistics assembled during a recent period, which, while not sufficiently complete for an exact year-by-year comparison, tend to show an actual increase in 1934. The records of parcel post dispatched and received which are furnished to the Department by our exchange offices as the basis for accounts with foreign countries show also that in the case of parcel post exchanged with the countries of Central and South America, as well as with Mexico, there was a noticeable increase in 1934.

VOLUME OF MAILS AND REVENUE

Based on the actual count for 7 days in October 1933 and 7 days in April 1934, at all United States exchange post offices, it is estimated that the number of letters and other articles, excluding parcel post, dispatched to foreign countries, by land, sea, and air during the fiscal year was 286,015,990, a decrease of 11.22 percent from the preceding year, while the number received from all countries was 263,438,214, a decrease of 1.15 percent.

The amount of postage, including air-mail and special-delivery fees, prepaid by the senders on such articles sent to foreign countries and the deficient postage collected from the addressees in this country on unpaid and short-paid articles received from abroad was \$11,024,931,

a decrease of 8.01 percent from 1933.

Of the above totals, the number of articles dispatched to countries other than Canada and Mexico was 175,581,900, a decrease of 15.34 percent from 1933, and the number received was 186,096,066, a decrease of 0.94 percent from 1933, while the postage collected is estimated at \$7,872,207, a decrease of 9.34 percent from 1933.

The decrease was 4.12 percent for mails dispatched to Canada and 1.50 percent for mails received. In the case of Mexico the decrease was 0.22 percent for mails dispatched and 3.47 percent for mails

received.

In addition to the postage (including air-mail and special-delivery fees) amounting to \$11,024,931, collected on regular mail articles according to the above count, it is estimated that the postage collected on parcel post to foreign countries and to the insular possessions was \$3,327,357.10, making a total of \$14,352,288.10 for both regular mail and parcel post.

Furthermore, there was collected as fees on registered, insured, and c. o. d. mail and parcel post; as charges for return receipts and for inquiries and complaints; as charges in connection with applications for return and change of address of mail and parcel post; as fees for customs clearance of letter packages, small packets, and parcel-post packages; as delivery fees on parcel-post packages and small packets;

as charges for certificates of mailing for parcel-post packages; as storage charges on parcel post; and as charges for receipts on ordinary parcel-post packages addressed for delivery in Americo-Spanish (Pan American) Postal Union countries (except Canada and Cuba), a total of \$847,948.06.

The number of parcel-post packages dispatched to foreign countries was 3,035,957, a decrease of 13,049, or 0.43 percent, while the weight was 21,809,268 pounds, a decrease of 767,704 pounds, or 3.40 percent.

The number of parcels received from other countries was 1,034,604 a decrease of 196,051, or 15.93 percent, while the weight was 8,014,-833 pounds, a decrease of 1,913,100 pounds, or 19.27 percent.

The weights of mails dispatched by air were:

On United States foreign air-mail routes: United States origin (increase over 1933, 16 percent)	Pounds 85, 989
Foreign origin (increase over 1933, 11 percent)	91, 584
Canal Zone origin (increase over 1933, 3 percent)	8, 404
Total (increase over 1933, 11.56 percent)	185, 977
On United States domestic routes only:	
Foreign origin (increase over 1933, 7 percent) (does not include mail	
from Canada and Mexico, figures on which are not available)	10, 882
On foreign routes other than those of Canada and Cuba:	
United States mails (increase over 1933, 19 percent)	14, 129
m	

The weights of mails (United States and foreign origin) dispatched by sea from United States ports to foreign countries and to our possessions were:

	Pounds	
Letters and post cards	4, 431, 928	
Prints	29, 673, 324	
Parcel post	18, 262, 980	
TD 4.1	FO 900 000	

These weights show a decrease of 3.49 percent from the preceding year. They do not include mails dispatched overland to Canada, Cuba, and Mexico, these mails (except parcel post) being included in the estimate based on the semiannual count referred to previously. The total parcel post dispatched to Canada decreased 2.58 percent, while that received from Canada decreased 4.45 percent. To Mexico, the parcel post dispatched increased 20.50 percent, while that received increased 40.89 percent. To Cuba, the outgoing parcel post decreased 6.09 percent, while the incoming decreased 29.45 percent.

The percentage of all mails dispatched in American ships during the year was 69 percent, as against 69.4 in 1933.

The weight of trans-Atlantic mails dispatched was 24,561,207 pounds, of which American ships carried 56.7 percent, as against 59.6 percent in 1933.

The weight of mails to Central and South America and the West Indies was 16,948,403 pounds, of which American ships carried 81.4 percent, as against 82.9 percent in 1933.

The weight of trans-Pacific mails dispatched was 10,858,622 pounds, of which 77.7 percent was carried in American ships, as against 72.3 percent in 1933.

APPROPRIATIONS AND COST OF SERVICE

The appropriations for the fiscal year 1934 are:

For foreign mail transportation	835, 500,	000
For balances due foreign countries	1, 000,	000
For indemnities, international mail	15,	000
Total	36, 515,	000

(In addition to the above, \$2,600,000 was transferred to the appropriation for foreign mail transportation from the United States Shipping Board for payment of service on contract route no. 57 and \$173,000 was transferred from the appropriation for star-route service, none of the latter having been used.)

The appropriations for the fiscal year 1935 are:

For foreign mail transportation	\$37, 500, 000
For balances due foreign countries	1, 000, 000
For indemnities, international mail	15, 000

Total______ 38, 515, 000

The amounts estimated as necessary for the fiscal year ending June 30, 1936, are:

For foreign mail transportation	\$41, 500, 964
For balances due foreign countries	1, 300, 000
For indemnities, international mail	20, 000

Total______ 42, 820, 964

This is \$4,305,964, or 11.2 percent, more than the appropriation for the fiscal year 1935.

The cost of the international postal service during the fiscal year ended June 30, 1934, is estimated as \$38,967,987.82, of which \$35,386,458.69 is chargeable to the appropriation "For the transportation of foreign mails" and \$2,567,927.50 is chargeable to a fund of \$2,600,000 transferred from the United States Shipping Board for payment of service on contract route no. 57; \$1,000,000 chargeable to the appropriation "Balances due foreign countries" (many of the accounts with foreign countries are still necessarily unsettled, so that it is difficult at the time of submission of this report to determine, even approximately, the expenditures chargeable to this appropriation); \$13,601.63 (partly estimated) chargeable to the appropriation "Indemnities, international mail" (a number of items chargeable to

this appropriation are still under investigation so that an accurate statement of expenditures is not possible at this time).

The foregoing amounts were distributed as follows:

The foregoing amounts were distributed as follows.	
Appropriation for foreign mail transportation:	
Trans-Atlantic ocean-mail service:	
Contract	\$12, 101, 210, 59
Noncontract	629, 338, 69

gation)	13, 601. 63

CONTRACT OCEAN MAIL (MERCHANT MARINE) SERVICE

No additional contracts were let during the year under the Merchant Marine Act. The total number of routes under contract remained the same as at the close of the previous fiscal year—that is, 44. A

complete list will be found in table 47 of the appendix.

No new vessels were completed during the year under the requirements of these contracts. However, the contractors reconditioned existing vessels with tonnage aggregating 42,419 tons, at a cost of approximately \$1.192.518. The total construction to June 30 under the merchant-marine contracts consists of 31 modern new vessels, aggregating approximately 342,501 tons, at a cost of approximately \$138.435,852 and 42 reconditioned vessels, aggregating 235,673 tons, at a cost of approximately \$15,673,591.

The cost of the contract ocean-mail service during the fiscal year was \$29,611.481.99, of which \$2,567,927.50 was expended from a fund transferred from the United States Shipping Board to cover the cost of route 57, while the cost of carrying the same mails on a weight

basis would have been \$2,598,962.86.

SEA POST SERVICE

Sea post service was in operation on 43 ships, 22 in the trans-Atlantic service manned by 32 clerks and 21 in the trans-Pacific service manned by 16 clerks.

The approximate number of articles distributed was, in the trans-Atlantic service, 46,619,742 pieces of ordinary mail, 467,615 registers. and 37,642 sacks of papers and, in the trans-Pacific service, 10,648,542 pieces of ordinary mail, 103,125 registers, and 4,652 sacks of papers.

In addition to the distribution of mail in transit, the clerks on trans-Atlantic steamships registered 2,323 articles and sold postage stamps amounting to \$9,038.11, while those on trans-Pacific steamships registered 672 articles, insured 187 articles, and sold postage stamps amounting to \$8,938.61.

Various improvements have been inaugurated in the distribution of the mails in sea post offices, with the view of expediting delivery and eliminating rehandling. A revised scheme of distribution for the use of sea post clerks in the trans-Atlantic service is now in course

of printing.

The distribution on westbound voyages of air mail originating in European countries was inaugurated with the sailing of the steamer Leviathan from Le Havre, France, on June 19. This results, in some cases, in earlier air dispatch from New York than if the mail were forwarded to the New York post office for distribution. It also relieves the latter office of this work, without the need for additional clerical assistance in the sea post.

NAVY MAIL SERVICE

Navy mail service was in operation on 230 naval vessels and at 92 domestic and foreign shore establishments, 115 of which had money-order facilities. The personnel of this service numbered 315 Navy mail clerks and 51 assistant Navy mail clerks, a total of 366. Navy mail service was placed in operation on 13 new vessels and at 10 shore establishments.

All Navy post offices are under the direct supervision of naval officers, who are required to make monthly and quarterly audits of the stamp stock and funds. As this is considered adequate inspection for nonmoney-order offices, the regulations providing for the annual inspection by post-office inspectors of all post offices on naval vessels and shore stations were amended to provide for such inspection only of post offices on vessels and stations which transact money-order business.

INTERNATIONAL AIR-MAIL SERVICE 4

The performance on our international air-mail routes, including that from New York to Montreal, was 99.46 percent of the service scheduled.

A new contract was made, effective July 1, 1933, for service on the Seattle-Victoria route, for a term of 4 years, with the Seattle-Victoria Air Mail, Inc., Seattle, Wash., at 53 cents per mile for a specified load of not exceeding 800 pounds per trip each way, and a pro rata of 26½ cents per pound per 1,000 miles for mails required to be carried in the same aircraft in excess of the specified load, each way. As the rates under the old contract were 76 and 38 cents, respectively, the new contract rates constitute a saving of \$4,960.76 for the year.

Effective March 20, 1934, Puerto Cumarebo (State of Falcón), Venezuela, was added as a stop on F. A. M. route 5, between Maracaibo and La Guaira, eastbound and westbound.

Commencing with southbound flight of April 29, 1934, the route flown between Habana and Cienfuegos, Cuba, was changed slightly, resulting in a lesser mileage of 7½ miles each way, thereby constituting a saving of \$540 for the balance of the year; \$3,120 for the next fiscal year.

A new contract was made with the Tropical Airways, Inc., to cover service on the New Orleans-Pilot Town air-mail route for the last 6 months of the year at a rate of \$48 per round trip. As the old contract called for \$49 per round trip, this made a saving of \$95 for the 6 months. This route was discontinued on June 30, 1934, and as the cost of the service for the year was \$10,411.19, it is estimated the saving for the next fiscal year will be about this amount.

⁴ See table 51 of the appendix.

INTERNATIONAL PARCEL POST SERVICE

On October 4, 1933, the provisions of a new parcel-post agreement with Dutch (Netherlands) East Indies were made effective. The principal feature of this new agreement is the provision for the exchange of insured parcels with a maximum indemnity of \$100 for loss, rifling, or damage.

On November 1, 1933, there were made effective the provisions of a new agreement with Denmark for collect-on-delivery service in connection with insured parcels. The maximum amount for collection

is \$100.

Effective May 1, 1934, registered parcel post service with Chile was discontinued and only ordinary parcels are now accepted for mailing to Chile.

Negotiations are now in progress with other countries for the conclusion of new parcel-post agreements providing for insured and c. o. d. services.

During the year our maximum weight limits for international parcel post have been extended, by mutual agreement, to parcels exchanged

with several additional countries.

The arrangement for the alternative disposition of parcel-post packages which cannot be delivered as originally addressed has been extended, by mutual agreement, to our parcel-post exchanges with additional countries so that this arrangement is now in effect with nearly all the countries of the world. A special sticker to be pasted on the wrapper of a parcel has also been provided for use in cases where this information is required to be shown on the parcel as well as on the customs declaration or dispatch note attached thereto.

INDEMNITY 5

Nine hundred and thirty international registry claims were paid amounting to \$6,100.71, an average of \$6.56 per claim, chargeable to 1934 and prior fiscal years, an increase of 24 percent over the number of paid international registry claims for the prior fiscal year. The ratio of losses to the total number of articles registered was 0.023209 percent.

Five hundred and thirty-six claims for indemnity were paid, involving international insured mail amounting to \$4,261.52, an average of \$7.95 per claim, chargeable to 1934 and prior fiscal years, an increase of 0.03 percent over the number of paid indemnity claims involving international insured mail for the preceding fiscal year. The ratio of losses to the total number of parcels insured was 0.180199 percent.

Thirty-six international c. o. d. claims were paid, amounting to \$566.14, an average of \$15.73 per claim, chargeable to 1934 and prior

⁵ See table 50 of the appendix.

fiscal years, an increase of 83 percent over the number of paid international c. o. d. claims for the previous fiscal year. The ratio of losses to the total number of c. o. d. parcels mailed was 0.536993 percent.

Thirty-two claims for indemnity were paid, involving ordinary parcel-post mail, amounting to \$173.26, an average of \$5.41 per claim, chargeable to 1934 and prior fiscal years, a decrease of 13 percent below the number of paid ordinary parcel-post claims for the preceding fiscal year. The ratio of losses to the total number of ordinary parcels mailed was 0.028272 percent.

A total of 1,534 international indemnity claims of all kinds was paid, amounting to \$11,101.63, an average of \$7.23 per claim. This is an increase of 269 in the total number of claims paid and an increase of \$387.93 in the total amount. The average amount per claim paid was \$1.24 less than the average for the previous year.

MISCELLANEOUS

The statistics of international-mail transactions for the fiscal year 1934 were taken during the months of July, August, and September, 1933, instead of during the entire year as heretofore, and provision has been made for taking these statistics in the future during the last 2 weeks of October and the first 2 weeks of May. This will result in considerable saving of work on the part of postal employees throughout the country without affecting the usefulness of the statistics in question.

Effective January 1, 1934, provision was made for the issuance of certificates of mailing for ordinary Postal Union articles (letters, post cards, printed matter, samples of merchandise, commercial papers, and small packets) so that it is now possible for senders to obtain a certificate of mailing for any ordinary article dispatched in the Postal Union or parcel-post mails upon the payment of a fee of 1 cent for each article. A certificate of mailing may also be obtained as additional evidence of mailing for articles dispatched in the registered and insured mails (Postal Union or parcel post).

UNIVERSAL POSTAL CONGRESS OF CAIRO

The tenth Congress of the Universal Postal Union convened at Cairo, Egypt, February 1, 1934, for the purpose of revising the convention and agreements concluded by the Congress of London, and closed its sessions on March 20 with the signing of the new convention and agreements by the delegates of the member countries. The new acts will become effective January 1, 1935.

The Congress, as is the usual practice, was organized into committees to deal with the various instruments and to prepare the drafts of the new acts for submission to and adoption by the Congress at its plenary sessions, of which there were seven. There were also 13 sessions of the first committee (convention); 9 sessions of the second committee (parcel post and insurance); 7 sessions of the third committee (money orders, postal checks, collection orders, and newspaper subscriptions); 16 sittings of the drafting committee; and 5 sittings of the subcommittee on forms.

As the United States is not a party to all the acts of these Congresses but only to the principal convention, mention is here made of only the more important changes in this instrument, these being as follows:

Uniform dimensions were prescribed for all articles except post cards.

The delivery fee for small packets has been increased from 25 to 50 centimes with the additional provision that as much as 75 centimes may be charged in case of delivery at the residence of the addressee.

The inquiry fee, the maximum of which has been reduced from 1 franc to 50 centimes, is collected for each article, even if the inquiry relates to several articles mailed simultaneously by the same sender to the same addressee.

Although inquiries are accepted only within the period of 1 year as heretofore, administrations must comply with simple requests for information up to 2 years.

The addressees of unpaid or insufficiently prepaid registered articles erroneously dispatched will, under the new convention, be liable to a charge equal to only the deficiency instead of double the deficiency as heretofore.

The transit charges due from one administration to another on correspondence sent in "open mail" and the charges for "warehousing", with two special exceptions, have been eliminated while the "closed-mail transit" charges have been reduced 20 percent for both territorial and maritime transit.

The restriction that registered articles mailed in transparent-panel envelops are admitted only if the panel forms an integral part of the envelop is eliminated.

The texts, colors, and sizes prescribed by the convention for the forms used in the international service are now made compulsory instead of optional as heretofore.

No special label was heretofore prescribed for sacks containing empties, but the Congress of Cairo prescribed that green labels be used in the future. The color of the labels for registry sacks has been changed from light red to vermilion red in order to facilitate distinguishing these sacks by assuring a more uniform shade of red. These changes were urged by the United States, as well as one that discontinues the use of the red label on a letter-bill sack when no registered mail is contained therein and another which provides that sacks of ordinary mail are always delivered in bulk at debarkation ports.

The more important changes in the air mail regulations are a provision that, if not contrary to the regulations of the country of destination, the recipients of air mail correspondence may ask the delivering post office to deliver their air correspondence by special messenger subject to a charge which may not exceed the ordinary special delivery fee; and a reduction in the extra charge to be made for air-mail articles transmitted in open mail.

The Congress of Cairo selected Buenos Aires as the meeting place of the eleventh Congress, to be held in 1939.

DIVISION OF AIR MAIL SERVICE

OLD SERVICE

At the beginning of the fiscal year 1934 the rates being paid to airmail contractors were on the basis of approximately \$20,000,000 per year. A complicated system of variables was in effect which required pay for other than mail service. The amount actually paid out for the year ending June 30 was \$19,400,264.81. Since the appropriation for the fiscal year 1934 was only \$15,000,000, it was necessary to readjust the service and the rates in order to stay within the appropriation. Effective September 1 all variables involving increased pay for passenger traffic, multimotored equipment, night flying, fog and terrain conditions were discontinued and in lieu thereof were substituted rates varying from 40 to 45 cents per mile, depending upon the number of trips involved, which decreased the average rate per mile from 54 cents for the fiscal year 1933 to 42.658 cents.

Many useless trips were eliminated and the schedules on the remaining trips were improved. These rates were in effect until the time of the annulment of the contracts and would have kept expenditures within \$14,000,000 for the service being performed. In making the readjustments necessary to stay within the appropriation, it was necessary to eliminate service from four cities.

ARMY SERVICE

After the annulment of the contracts, the Army Air Corps was ordered to transport the mails over necessary routes during the emergency. The Army assumed this task on some routes on February 19, 1934, and continued to perform service on various routes to May 31, 1934. During the period of this operation a total of 1,719,919 miles were flown with mail. The cost of this service was \$2,249,004.31. Included in this amount is the cost of the transportation of personnel and equipment and other initial overhead expenses incurred in setting up operations and expenses incurred in the discontinuance of operations.

NEW SERVICE

Since March 30, 1934, 33 new routes have been established; more than 25,000 advertisements were distributed; 110 bids were received and examined; 33 contracts prepared and executed; 41 cachets prepared for first flights on various routes. In short, it was necessary within the space of 3 months to plan, advertise, inaugurate, and start the administration of an air-mail system greater than the system which had been gradually developed during the years from 1926 to 1934. This new domestic system embraces 28,795 route miles, which is 3,547 more route miles than existed at the time the old contracts were annulled. The new system will serve four States, the Hawaiian Territory, and 41 cities which did not have service when the old contracts were annulled. The average rate per mile is 26.802 cents under the new contracts as compared to 42.658 when the contracts were annulled; 54 cents in the fiscal year 1933; 61.9 in 1932; 79.2 in 1931; 97.8 in 1930; and \$1.094 in 1929.

AIR MAIL FLYER'S MEDAL OF HONOR

An Air Mail Flyer's Medal of Honor was awarded to Mal B. Freeburg, who distinguished himself by an extraordinary achievement while participating in an air-mail flight on April 12, 1932. This medal was presented to Mr. Freeburg by the President on December 13, 1933. It is the first medal of honor which has been awarded under the act approved February 14, 1931, which provides that the President may present a medal of honor with accompanying ribbon to any person who while serving as a pilot in the Air Mail Service since May 15, 1918, has distinguished, or who, after the approval of this act, distinguishes himself by heroism or extraordinary achievement while participating in such Service. Decisions are pending in a number of other cases.

DIVISION OF RURAL MAILS

Thirty-three petitions for the establishment of new routes were pending at the beginning of the year and 141 petitions were received during the year. Before favorable action is taken upon such requests, field investigations are made by inspectors to determine whether the postal benefits to be afforded and the local conditions justify establishment of the service.

Of the petitions received during the year, 102 were accepted for investigation and 40 were rejected as not meeting the requirements. Ninety-eight petitions were approved, but action has been withheld because of the necessity to hold down postal expenditures.

Thirty-two cases were in the hands of field representatives for investigation and report at the close of the year. One new route was established incident to a readjustment of star route service.

One thousand and forty-six extensions of rural routes were authorized, providing more convenient service to 13,488 families. By the establishment and extension of routes, 5,000 families, or 18,000 individuals, were benefited.

On June 30, 1934, 37,108 rural routes were in operation, by which approximately 6,946,000 families, or 25,731,000 individuals, were

given postal service.

During the year, 2,912 routes were discontinued, 1 route was established, and 6 routes which had formerly been absorbed through consolidations of service were reestablished, a net reduction of 2,905 routes.

The reduction in the number of rural routes resulted from consolidations of service as vacancies occurred in the rural carrier force and in connection with the separation of carriers who had completed 30 years of service and who were, therefore, eligible under existing law for substantial retirement annuity, investigations having disclosed that there would be no impairment of the service to the patrons. Through consolidations, 2,909 routes were discontinued during the fiscal year 1934, with an actual saving in that year of \$1,534,388, and a reduction in the annual rate of cost of \$3,309,349. The number of routes discontinued since October 1925, when the first consolidations were made, is 8,861, at a reduction in annual cost of \$9,797,830.

Although the consolidation of routes does not as a rule result in any material reduction in mileage, it reduces the rate of cost and places the service on a basis in keeping with the advantages afforded

by improved roads and transportation facilities.

The 37,108 routes in operation at the close of the year were of an aggregate length of 1,359,895 miles, and the carriers traveled 1,348,761 miles each schedule day and 412,720,866 miles during the year. The average length of rural routes was increased from 34.132 to 36.647 miles. During the past 10 years there has been a net decrease of 7,652 routes, or 17.10 percent. The mileage added in the same

period is 154,181, or 12.79 percent.

There were 37,019 rural carriers on June 30, 1934, a decrease of 2,905, as compared with the previous year. The average annual salary of the carriers was \$2,170, exclusive of the equipment maintenance allowance. The average salary of carriers serving rural routes daily, except Sunday, was \$2,185. The average compensation of those serving triweekly routes was \$1,322. Both figures are exclusive of the equipment maintenance allowance. The salary cost for each mile of travel was 19.47 cents, as compared with 20.13 cents the previous year. With the equipment maintenance allowance of 4 cents a mile the total cost of a mile of travel was 23.47 cents.

The number of vacancies arising in the rural carrier force during the year was 948, a decrease of 482, as compared with the year 1933. Of the vacancies, 99 were due to resignations, 350 to retirements, 256 to deaths, 221 to removals for cause, 12 to separation without prejudice, and 9 to transfers of carriers to other branches of the service.

In former years reasonable extensions of Rural Delivery Service to new territory and new patronage were made as conditions were found to warrant them, and this new Service was largely or entirely paid for from funds accumulated by making consolidations. At present additional expenditures are avoided, as far as practicable, and extensions are authorized only where necessary because of unusual service, road, and other conditions.

BUREAU OF THE THIRD ASSISTANT POSTMASTER GENERAL

DIVISION OF FINANCE

During the fiscal year 1934 the postal revenues, including the fees from money orders and profits from Postal Savings business, amounted to \$586,733,165.80, while during 1933 they amounted to \$587,631,364.48. The revenues decreased \$898,198.68 from 1933, or 0.15 percent, as compared with a decrease of 0.09 percent in 1933 from 1932.

The audited expenditures, exclusive of \$34,066.84 losses by fire, burglary, and other causes, amounted to \$630,732,933.82 for the fiscal year 1934, a decrease from the year 1933 of \$69,154,252.54. The audited expenditures exceed the revenues by \$43,999,768.02, and, in addition, there were the losses referred to making the cash deficiency in postal revenues \$44,033,834.86.

The deficiency is subject to adjustment, however, since it is based on actual payments made during 1934 and includes payments for services rendered in previous fiscal years which could not be paid at the time the obligations were incurred. The payments on account of prior years should be eliminated in such adjustment, and, in like manner, similar obligations incurred in 1934 and subsequently paid should be taken into account.

The above is the cash deficit shown in the statement of transactions for the year. When the additional elements referred to are taken into account the result is as follows:

The expenditures during the fiscal year, including \$34,066.84 losses by fire, burglary, etc., amounted to \$630,767,000.66. This includes \$20,070,594.23 paid on account of undischarged obligations carried over from previous years, which, deducted, leaves \$610,696,406.43 as the expenditures during the fiscal year applying to the service of that year. To this should be added \$21,933,875.34, the obligations for 1934 outstanding on June 30, 1934, making a total of expenditures and undischarged liabilities chargeable to the fiscal year 1934 of \$632,630,281.77 and an operating deficit of \$45,897,115.97.

DIVISION OF POSTAL SAVINGS

On June 30, 1934, there was held in trust for Postal Savings depositors the sum of \$1,220,549,448.99, an increase of \$16,706,689.69 over the amount for the corresponding date last year. The classification of the amount was as follows: Outstanding principal, represented by certificates of deposit, \$1,197,907,773; accrued interest,

\$22,562,687.09; outstanding savings stamps, \$66,573.90; unclaimed deposits, \$12.415.

The number of depositaries in operation was 8,059, including 812 branches and stations, a net increase of 171 depositaries during the year.

In the interest of good administration, the privilege of transferring accounts between depositary post offices, free of cost to depositors, was indefinitely suspended, effective at the close of business September 15, 1933.

Accounts of deceased and incompetent depositors to the number of 14,773, involving \$9,754,130, were approved for payment to the next of kin or legal representatives, an increase of 4,656 in the number of depositors and \$3,014,023 in the amount paid.

Postal-savings certificates, bearing 2 percent interest, are exchangeable as of January 1 and July 1 of each year for postal-savings bonds, bearing interest at the rate of 2½ percent. Depositors to the number of 18,900 availed themselves of this conversion privilege during the fiscal year 1934 in the amount of \$27,579,500, an increase of \$9,199,480 by comparison with 1933. Bonds outstanding June 30, 1934, totaled \$78,058,180.

Despite the bond conversion mentioned above, the balance to the credit of Postal Savings depositors increased \$10,733,980—which, when compared with the corresponding figure of \$402,365,585 for 1933, gives evidence of stabilization in the financial life of the country. During the same period the number of depositors increased from 2.342,133 to 2,562,082.

Of the balance to the credit of depositors, \$694,575,368.74 was on deposit in banking institutions to the number of 5,365, as against

5,521 a year ago.

Administration, embracing a period of 24 years, shows clearly that the institution of a system of postal savings was statesmanlike; that the System long ago passed the experimental stage; and that it should be looked on as a permanent Government institution.

A detailed statement of operations and balance sheet of the Postal

Savings System will be found in the appendix.

DIVISION OF MONEY ORDERS

VOLUME OF MONEY-ORDER TRANSACTIONS

For the first time since 1930 both the number and amount of domestic money orders issued and paid showed an increase over the preceding year. The increase in the value of the money orders is especially to be noted, as during the latter part of the preceding fiscal year postal money orders had been used extensively for transactions ordinarily considered as functions of the banks. The increase in the number of

domestic money orders issued was 15.88 percent and in their value 7.85 percent, while for domestic money orders paid the number was 14.62 percent and the value 8.14 percent greater than in 1933. The average value of domestic money orders and fees decreased slightly, indicating that, as compared with the previous 12-month period, proportionately more money orders of the smaller amounts were demanded by patrons.

The restrictions on sending funds out of the country and the continued world-wide depression have combined to cause a further decline in international money orders sold. The number of money orders issued in the United States for payment abroad decreased as compared with the preceding year by 10.62 percent and the amount by 14.45 percent. An increase of 13.96 percent and 19.37 percent, respectively, in the number and value of money orders sent into the United States from other nations appears to have been caused principally by the growing use of postal money orders by foreign customers to pay for purchases made of American merchants.

The net revenue from money-order business was \$18,140,665.65, exceeding that of 1933 by \$2,305,541.08. Although most of this added revenue was obtained because more money orders were issued than in the preceding year, a substantial portion of it was made up from the profit on purchases of foreign exchange, this item alone contributing \$104,410.64 to the earnings of the money-order system.

MONEY-ORDER POST OFFICES

As all post offices except a few in Alaska now transact money-order business, changes in the status of post offices necessarily affected the number of offices where money orders could be purchased or presented for payment. At the close of business on June 30, post offices and stations to the number of 53,719 were designated as money-order offices. On June 30, 1933, the number was 54,842, the net decrease for the year being 1,123.

MONEY-ORDER RESERVES AND CREDITS

To insure the prompt payment of money orders and to provide funds for other office needs, Presidential post offices of the first and second class upon request are permitted to withhold from deposit surplus money-order funds to a certain designated amount. Such funds, known as "money-order reserves" were authorized at the end of the year at 3,805 post offices. Although this was a decrease of 155 in the number of post offices permitted to carry reserves, the amount thus allowed to be retained increased to \$5,909,120, which was greater by \$747,025 than at the close of the previous fiscal period. Besides the money-order reserves postmasters at all classes of post offices are,

upon application, granted a credit on money-order account with the Treasurer of the United States against which checks may be drawn when additional funds are needed. The value of such checks paid during the year totaled \$1,127,733,450.73, as compared with \$1,033,-443,851.34 in 1933. The activity in the use of these checks, which was so pronounced in the latter half of the preceding fiscal period, continued during 1934, as postmasters found that they were allowed to use this quick and convenient method for obtaining funds for other postal purposes than the payment of money orders.

FOREIGN EXCHANGE PURCHASED

The decline in the volume of money orders sent to other countries caused a corresponding decrease in the amount of foreign exchange purchased to discharge our indebtedness to other postal administrations. The total amount of such exchange bought was \$9,328,842.63, on the purchase of which a net profit of \$104,410.64 was realized. Only a portion of the indebtedness to other countries was paid in foreign currencies, the remainder of \$11,627,519.31 being settled on the basis of the United States dollar.

INTERNATIONAL MONEY-ORDER BUSINESS

Although fewer money orders were sent to other countries there were no actual suspensions of money-order agreements nor any important modifications of existing conventions. Negotiations looking to the resumption of the exchange of money orders between the United States and the French Levant were conducted, but not finally concluded.

The fluctuations of Canadian exchange during the year made it necessary to protect the postal revenues by exacting an exchange charge, in addition to the regular money order fee, for money orders payable in Canada and Newfoundland. A charge of 2 percent was prescribed effective December 18, 1933, but was removed temporarily on February 1, 1934. Until the end of the fiscal year it was possible to avoid reimposing the exchange charge, although the Canadian dollar gradually increased in value. The sum of \$9,249.29 was collected during the short period that the exchange charge was in effect.

ALLEGED WRONG PAYMENT OF MONEY ORDERS

Occasionally, notwithstanding the care exercised by the employees paying money orders, a complaint is made that a money order has been improperly paid. Each case is carefully investigated and if the claim is found to be just, the Department attempts to adjust the case

to the satisfaction of the patron. For the year the number of complaints was 1,568 involving money orders with a total value of \$20,413.84. The result of the investigations is shown by table 12, from which it will be seen that recoveries were made in more than two-thirds of the cases.

ELECTRICAL ACCOUNTING SYSTEM

During the year at several offices the use of the electrical accounting system for tabulating paid money orders was adapted to other tabulating purposes, such as cost ascertainment and Postal Savings transactions. No other post offices were directed during the year to send money orders to other points for tabulation by electrical accounting system, although arrangements were completed to make a number of changes on July 1.

MONEY ORDERS IN PAYMENT OF GOVERNMENT LOANS

The precedent set in 1932 of remitting payments on crop-production loans by means of postal money orders was extended to other activities, particularly those of the Federal Housing Administration and the Home Owners' Loan Corporation. Public voucher no. 1034 was continued in use by postmasters as a means for claiming reimbursement for money-order fees, exchange charges, etc.

ENACTMENT OF LAW REQUIRING A FEE FOR A MONEY ORDER PAID AT AN OFFICE OTHER THAN THAT ON WHICH DRAWN

On June 16, 1934, the President approved the act authorizing the exaction of a fee of the same amount as that charged when the order was issued whenever a money order is paid at an office other than that on which drawn. The law authorized the Postmaster General to fix the date upon which the charge should become effective, and by order no. 5738 that officer declared August 1, 1934, as the date upon which this change should be inaugurated. By this legislation a long-existing and serious abuse of the money-order system will be corrected, and although it is not expected that much revenue will be derived from the enforcement of the act, nevertheless it will save the Postal Service a very large amount annually.

DIVISION OF CLASSIFICATION

RECEIPTS FROM POSTAGE AND OTHER SOURCES OF REVENUE

The sources of revenue of the Postal Service are the postage paid on mail through the medium of stamps and stamped paper or in cash on permit matter mailed without stamps affixed; the fees on registered, insured, and c. o. d. mail collected in the same manner; from the

money order and postal savings businesses; the fees accompanying applications for entry as second-class matter or for permits to mail nonmetered matter without stamps affixed; box rents and other miscellaneous items set forth in the financial tables.

The postage paid on mail constitutes by far the largest source of revenue. The receipts from this source alone during the last fiscal year amounted to \$519,249,989.12, or 88.50 percent of the total revenues, a decrease of \$5,177,261.67 as compared with such receipts during the previous year. The postage paid by means of stamps affixed to mail amounted to \$417,683,458.93, while the postage paid in money on the various classes of matter mailed without stamps affixed, including second-class matter mailed by publishers and news agents, aggregated \$101,566,530.19. The average per capita expenditure for postage during the year was \$4.05.

The excess of the amount representing the sales of stamps and stamped paper, as shown in detail elsewhere in this report, over the amount of postage paid with stamps affixed represents the value of the stamps and stamped paper used for the payment of special delivery, registry, insurance, c. o. d., and other fees for special services, and the excess of the sale price of stamped envelops, books of stamps, etc., over their value for postage purposes.

Included in the postage collected by means of stamps affixed is \$1,740,295.32, collected on business reply cards and letters in business reply envelops, of which \$570,154.93 represents postage in excess of that at the regular rate on such cards and letters, a decrease of 4.16 percent in the total and 14.68 percent in the excess over the regular rate as compared with the previous year.

MATTER MAILED UNDER PERMIT WITHOUT STAMPS AFFIXED

The postage collected in money during the fiscal year on matter of the several classes mailed under permit without stamps affixed as metered or nonmetered matter, exclusive of second-class matter mailed by publishers and registered news agents at the pound rates, amounted to \$82,209,896.41 or 15.83 percent of the postage collected on all mail.

The act of July 7, 1932, prescribes a fee of \$10 to accompany applications for permits to mail nonmetered matter without stamps affixed. The amount of such fees collected during the fiscal year was \$87,810.

POSTAGE RATES AND APPLICATION FEES

Legislation was enacted by Congress during the past year making a number of changes of importance in postage rates as well as in the conditions pertaining to mail matter of the several classes, and in the fees required to accompany applications for entry of publications as second-class matter. The acts of Congress referred to, which will be discussed in more detail under the respective heads, were as follows:

The act of May 10, 1934, continued for another year, until July 1, 1935, the 3-cent rate on letters and other first-class matter mailed for other than local delivery.

The act of June 12, 1934, reduced the air-mail rate to 6 cents for each ounce or fraction thereof, regardless of distance.

The act of June 5, 1934, established a rate of 1 cent for each 2 ounces for periodical publications weighing in excess of 8 ounces, issued at regular intervals of 12 or more times a year, 25 percent or more of whose pages are devoted to reading matter and not more than 75 percent to advertising matter, and which are circulated free or mainly free.

The act of May 9, 1934, made provision whereby sound-reproduction records for the use of the blind may be mailed free of postage under certain conditions and increased the limit of weight of matter mailed free for the use of the blind.

The act of June 11, 1934, declared publications produced by the stencil, mimeograph, or hectograph process or in imitation of type-writing to be inadmissible as second-class matter.

The act of June 26, 1934, reduced the fees required to accompany applications for entry of publications as second-class matter in certain cases, and made provision for the return of one-half of the fee upon failure to obtain entry.

In addition to the foregoing the zone rates on the advertising portions of publications of the second class in effect prior to July 1, 1932, were automatically restored under the provision of the act of June 6, 1932, which increased such rates for the 2-year period ending July 1, 1934.

SECOND-CLASS MATTER

The revival in business which has been in evidence during the past year has brought about an increase in the mailings of newspapers and periodicals as second-class matter and in the amount of postage derived therefrom. This increase is particularly gratifying in view of the decline in both volume and postage during the previous 2 years.

The mailings of second-class matter at the pound rates and free in the county of publication during the past fiscal year aggregated 1,022,675,975 pounds, an increase of 54,021,919 pounds or 5.58 percent over the mailings for the previous year. The postage collected on the mailings at the pound rates amounted to \$19,355,415.91, an increase of \$1,204,305.38 or 6.63 percent as compared with the previous year.

The weight of the advertising portions of publications subject to the zone rates mailed during the year was 299,842,940 pounds, on which \$9,586,379.96 was collected, an average of 3.2 cents a pound. This was an increase of 33,958,329 pounds and \$919,720.94 postage as compared with the previous year. The weight of the reading portions of such publications was 484,194,565 pounds and the postage collected thereon \$7,278,786.51 as compared with 458,336,292 pounds and \$6,893,919.41 postage during the previous year.

The provision of the act of June 6, 1932, increasing the postage rates on the advertising portions of publications entered as second-class matter automatically expired on July 1, 1934, and the old rates of postage thereupon became effective. The rates in effect during the past 2 years, together with the decreases effective July 1, 1934, for the respective zones, are indicated below:

Zone	Rate per pound prior to July 1, 1934	Rate per pound effective July 1, 1934	Decr	ease
First and second	Cents 2 3 5 6 6 7 9 10	Cents 11/2 2 3 4 5 6 7 7	Cents 1/2 1 2 2 2 2 3 3 3	Percent 25, 00 33, 33 40, 00 33, 33 28, 57 33, 33 30, 00

The weight of the mailings of newspapers and periodicals published by and in the interest of religious, educational, scientific, philanthropic, agricultural, labor, and fraternal organizations at the special flat rate of 1½ cents a pound during the fiscal year 1934 was 99,141,135 pounds, on which \$1,490,366.19 postage was collected. It is estimated that \$1,908,466.86 would have been collected on the mailings of these publications if their advertising portions had been subject to the zone rates applicable to other publications. The estimated difference between the postage collected during the fiscal year 1934 on such publications accorded a special flat rate and that which would have been collected at zone rates of postage is \$418,100.67. This amount will, as provided by the act of June 9, 1930, be shown separately in the statements of the Treasury Department and the General Accounting Office with respect to the postal receipts and expenditures.

The weights of mailings of second-class matter, by States, together with the postage paid thereon, are shown in table 13 of the appendix.

On June 30, 1934, there were 9,668 post offices at which publications were entered as second-class matter. Of the total postage paid at the pound rates, 75.22 percent was collected at the 50 post offices having the largest mailings of such matter.

During the year 2,208 applications for the admission of publications to the second class of mail matter or for change in title, frequency of issue, or office of publication were received. Of these, 2,175 were

favorably acted upon and 33 denied. The number of publications discontinued during the same period was 3,006, leaving 26,308 having a second-class status at the close of the year, a decrease of 831 as compared with the previous year. There were 674 news agents' permits to mail second-class matter at pound rates outstanding at the close of the year.

Under the act of July 7, 1932, a fee of \$100 was required to accompany each application for original entry of a publication as secondclass matter, a fee of \$10 to accompany a request for reentry or additional entry, and a fee of \$20 to accompany an application for registry as a news agent. The fees thus received during the year amounted to \$64,370. In the last Annual Report recommendation was made that the application fee of \$100 be reduced in the case of small publications because experience had shown that the higher fee tended to discourage the establishment of small and meritorious publications serving a real, though limited field, and under the act approved June 26, 1934, the law was amended by reducing such fee from \$100 to \$25 in the case of publications having a circulation not exceeding 2,000 copies and from \$100 to \$50 for publications having a circulation greater than 2,000 but not more than 5,000 copies. The same act also authorizes the return of half the fee in case the applicant fails to obtain second-class entry for his publication. Under the previous law the entire fee was retained by the Department regardless of the action taken.

Another measure serving to aid legitimate publications of the country was the Act of June 11, 1934, embodying in the law a postal regulation of many years' standing under which alleged periodical publications produced by the stencil process or in imitation of type-writing are declared inadmissible as second-class matter. This provision is designed to prevent the mailing free of postage or at the nominal second-class rates of what in effect are mere bulletins or circulars of a restricted character in which the general public has little or no interest.

FREE MAIL PRIVILEGE

Following a custom of many years' standing in the case of widows of ex-Presidents, Congress during the past year (act of June 16, 1934) granted the franking privilege to Mrs. Grace G. Coolidge. Other legislation affecting the free mail privilege was the act of June 18, 1934, changing the date for the expiration of the franking privilege of Members of Congress for public documents from the 1st day of December to the 30th day of June following the expiration of the respective terms of office; and the act of May 9, 1934, making provision for the acceptance of sound-reproduction records for the use of the blind under the conditions already applicable to matter in

raised characters for the blind, and increasing the limit of weight of such matter from 4 pounds to 12 pounds.

The estimated number of pieces and weight of matter mailed free of postage under the penalty privilege by the departments and establishments of the Government, other than the Post Office Department, by Members of Congress and others under the franking privilege, by publishers of newspapers and periodicals of the second class free in the county of publication, and by those mailing free matter for the blind, during the fiscal year 1934, and the estimated revenue which would have been derived therefrom if such matter had been carried at the usual rates of postage, including registry fees on penalty matter registered free, are as follows:

	Number of pieces	Weight in pounds	Revenues at usual postage rates, includ- ing registry fees
Mailed under penalty privilege by departments and establishments of the Government, exclusive of the Post Office Department. Mailed under franking privilege: By Members of Congress. By others. Publications mailed free in county. Free matter for the blind.	530, 471, 016 20, 882, 779 6, 133 397, 398, 571 511, 539	81, 212, 639 7, 724, 910 674 54, 522, 708 1, 696, 591	1 \$23, 094, 882 775, 785 215 545, 227 103, 552
Total	949, 270, 038	145, 157, 522	24, 519, 661

¹ For postage, \$22,893,584; for registry fees, \$201,298.

The material increase in the number of pieces of matter mailed under the penalty privilege by departments and establishments of the Government, exclusive of the Post Office Department, from 43,326,622 pounds in 1933, to 81,212,639 pounds in 1934, is due, of course, to the creation and rapid growth of many new bureaus and establishments of the Government during the past year in connection with the National Recovery activities.

NEW AIR MAIL POSTAGE RATE

Since the inauguration of the Air Mail Service many changes have been made in the postage rates on air mail. The original rate was 24 cents an ounce. This was soon reduced to 16 cents. During the years of the Government-operated transcontinental route, postage on air mail was charged according to distance, based on three zones. For several years the rate was 5 cents for the first ounce and 10 cents for each additional ounce. When the ordinary letter rate was increased to 3 cents an ounce, the air-mail rate was also increased to 8 and 13 cents for the first ounce and each additional ounce, respectively. These various changes were made by the Department pursuant to the authority granted by Congress to the Postmaster General to

prescribe air-mail rates within the maximum of 24 cents and the minimum of 5 cents an ounce. By the Act of June 12, 1934, effective July 1, Congress fixed the rate at 6 cents for each ounce, regardless of distance, a reduction of 25 percent on the first ounce and more than 50 percent on additional ounces. The attention of other branches of the Government has been invited to the advantages of the Air Mail Service, since where telegrams are being sent it would often be more satisfactory to send the messages by air mail at the new rate because of the lower cost and the opportunity afforded of transmitting more complete instructions than is practicable in telegrams.

To obtain the maximum advantage of Air Mail Service, letters should be sent special delivery, thus obtaining immediate delivery at the office of address. In order to facilitate and popularize the use of this combined service, a new stamp covering both Air Mail and special-delivery service has been provided. A material increase in the volume of air mail is expected in view of the new low rate, and it is hoped that this increased volume will to a large measure offset the reduction in rate so far as the postage revenue is concerned.

MATTER DEPOSITED IN MAIL RECEPTACLES BY PRIVATE DISTRIBUTORS WITHOUT PAYMENT OF POSTAGE

The practice of private distributors of placing mailable matter, such as statements of account, bills, circulars or other like matter in letter boxes or other receptacles designated by the owner or user for the receipt or delivery of mail by city or village letter carriers had increased in recent years to such extent as to interfere with the depositing in such receptacles by the carriers of matter regularly in the mails on which proper postage was paid. This practice led to complaints from patrons who protested against the misuse and cluttering of their mail boxes with extraneous matter; it also affected the postal revenues adversely.

Letter boxes or other mail receptacles designated by the owner or user for the purpose of receiving mail are subject to the postal rules and regulations applicable to such receptacles. This means that not only is matter deposited therein to be treated in accordance with the rules governing the mails, including proper addressing and payment of postage, but it also carries with it the protection which the law affords to every authorized depository for mail matter.

To stop this abuse an order was issued on January 2, 1934, directing carriers, on finding in such letter boxes or receptacles any mailable matter on which no postage is paid addressed to or intended for the person in whose box it was deposited, to take the matter to the post office to be held for postage. This action led to immediate improvement in the condition referred to. Subsequently Congress en-

acted a law, approved May 7, 1934, prescribing a fine of not more than \$300 for the depositing of any mailable matter on which no postage has been paid in any authorized letter box on any mail route with intent to avoid payment of lawful postage thereon. The combined effect of this order and legislation has been practically to eliminate the improper use of letter boxes for depositing statements, circulars, and like matter without payment of postage and to restore to the mails a considerable volume of matter formerly delivered by private distributor. As a result of this action there has been a substantial increase in the postage collected on matter thus restored to the mails.

DOUBLE POST CARDS

With the passage of the act of June 6, 1932, increasing the letter rate of postage to 3 cents an ounce, some decrease in the volume of letter mail and an increased use of 1-cent postal and post cards were to be expected. Presently, however, it was noticed that double or reply post cards were being used instead of sealed letters for the purpose of sending out monthly statements of account and similar mat-The movement rapidly gained momentum, and during the past year the practice of many persons and concerns of sending out statements in this manner grew to such proportions as seriously to affect the postal revenues. The revenue from single post and postal cards at 1 cent each is not sufficient to cover the cost of handling such cards. Double cards are still more costly to handle and carry in the mails. The use of double cards prepaid only 1 cent for sending out statements which were formerly mailed at the letter rate thus represents a double loss to the Government, first, in the actual handling of the matter at a rate below cost, and second, in the loss of the revenue formerly received at the letter rate.

In the majority of instances, where the statements were sent out on double cards, the so-called "reply" portion was seldom used by the recipient, nor was this expected when the statement was originally sent out, the reply portion being a mere subterfuge whose real purpose was to cover up and give a measure of privacy to the statement on the inside of the folded card. In view of the wide-spread practice of mailing such double cards at the 1-cent rate, an order was issued on April 5, 1934, requiring postage at the letter rate on all double post cards of the kind in question which are not bona fide

reply cards.

MAIL ADDRESSED TO "BOX HOLDER"

In order that the simplified method of addressing mail to box holders on rural and star routes and to post-office box holders at offices not having City Delivery Service may be more readily utilized, com-

plete information as to the number of such box holders of the respective kinds has been compiled and is given in connection with the names of post offices in the county list of offices in the July 1934 Official Postal Guide. Matter mailed under this arrangement is addressed merely, "Rural Route Box Holder" or "Post-office Box Holder", together with the post office and State, and need not bear the name of the individual to whom it is to be delivered.

An order issued since the close of the fiscal year makes it optional for the mailer to use the word "Local" in lieu of the name of the post office and State. The order also extends this facility to matter to be delivered to patrons of city and village letter carrier routes, the address "Patron (or Householder), Letter Carrier Route" together with the post office and State or the word "Local" being used on such matter.

This method of addressing mail where it is desired to effect a general distribution of advertising matter, circulars, samples, etc., eliminates much of the labor and expense incident to the usual manner of addressing the matter to particular individuals. Because of its possibilities for the development of business and its economy and simplicity, as well as the satisfactory results obtained from its use, this facility is becoming increasingly popular.

DIVISION OF STAMPS

The revenue accruing from the sale of postage stamps and other stamped paper, as reported in postmasters' stamp accounts, totaled \$449,854,405.37, a decrease of 1.44 percent compared with the previous fiscal year. Sales of internal-revenue stamps in post offices reached a total of \$2,349,095.78, an increase of 62.6 percent compared with the previous year.

Approximately 80 percent of the yearly gross income of the Department is derived from the sale of stamped paper in post offices. To meet the public requirements there were issued to postmasters on requisition during the year a total of 15,872,730,157 postage stamps, postal cards, stamped envelops, and other varieties of stamped paper, an increase of 763,478,212 pieces compared with the prior fiscal year.

All adhesive postage stamps, including those in coils and books, are designed, engraved, and printed at the Bureau of Engraving and Printing, Treasury Department. Shipments of stamps are made from the Bureau by official registered mail to all direct and central accounting post offices, which include offices of the first and second classes. Distribution of stamps to district accounting post offices of the third and fourth classes is made on a fixed credit basis from the State central accounting post office.

Postal cards are manufactured at the Government Printing Office, Washington, D. C., and stamped envelops are produced under private contract, which is let, as provided by law, to the lowest bidder for a term of 4 years. The present envelop plant is located

at Dayton, Ohio.

To facilitate handling and as a measure of economy in the cost of distribution, subagencies for postal cards and stamped envelops are operated in 36 widely separated cities throughout the country under the supervision of the local postmaster. These subagencies are supplied with stocks of cards and envelops from the points of manufacture in carload lots by freight or mail storage cars at a minimum of expense. Distribution of cards and envelops is then made by mail to post offices located within the territory of the respective subagencies as needed to meet the public demand. During the year a total of 525,436,500 stamped envelops, having a selling value of \$14,076,812.96, and 1,590,257,450 postal cards, valued at \$16,292,228, were supplied to post offices from these distributing subagencies at a large saving to the Department.

The operation of these subagencies for postal cards and stamped envelops not only effects a material saving in the cost of distribution by utilizing cheaper transportation to the local territory, but in addition is of the utmost value in regulating the production of cards and envelops to conform to variation in the public demand. There were held in these reserve stocks at the close of business June 30, 1934, available for immediate use in filling post-office orders, 590, 259,250 stamped envelops, with a selling value of \$15,256,694.33, and

137.507,450 postal cards, valued at \$1,598,801.

The list of special issues of postage stamps authorized during the year, in addition to the NRA stamp, mention of which was made in the last report, included the 50-cent Graf Zeppelin, 5-cent Kosciusko, 3-cent Little America, 3-cent Maryland Tercentenary, 3-cent Mothers', 3-cent Wisconsin Tercentenary, and a special series of national-parks stamps. To the regular issues there were added a new air-mail stamp and stamped envelops in the 6-cent denomination. A special printing was also authorized of the 1-cent and 3-cent Century of Progress stamps in the form of souvenir sheets of 25 stamps each. Likewise, a special sheet containing six of the Little America stamps was provided.

The 50-cent Zeppelin stamp was issued for use on air-mail letters carried on the *Graf Zeppelin* flight to the Century of Progress Exposition in October 1933. The central design depicts this airship flying over the Atlantic Ocean, with the hangar at Friedrichshafen at the right and the Federal Building at the exposition at the left. The Zeppelin stamp was first placed on sale at the post office in New York, N. Y., on October 2, 1933. The stamp was also placed on sale shortly thereafter in Chicago, Ill., as well as at Miami, Fla., and Akron, Ohio, where stops were made to take on mail.

The 3-cent Little America stamp was issued for use on mail matter dispatched through the temporary post office established at the base camp of the Byrd Antarctic Expedition. The stamp is blue in color and has for its central design a large geographic globe on which the position of Little America is marked, together with dotted lines to indicate the several previous Byrd flights as well as proposed new flights, in the Antarctic and to the South Pole. The Little America stamp was first placed on sale October 9, 1933, at the Philatelic Agency, Post Office Department. As the stamp was not designed for ordinary mailing purposes, it was not placed on sale in post offices.

The stamp issued in honor of General Kosciusko was provided in connection with the national celebration of the one hundred and fiftieth anniversary of the naturalization of Kosciusko as an American citizen. The stamp is blue in color and has for the central design a reproduction of the Kosciusko statue in Lafayette Park, Washington, D. C. The Kosciusko stamp was first placed on sale October 13, 1933, in the following cities: Chicago, Ill., Boston, Mass., Detroit, Mich., Kosciusko, Miss., St. Louis, Mo., Buffalo, N. Y., and Pittsburgh, Pa.

The Maryland Tercentenary stamp was issued in commemoration of the three-hundredth anniversary of the arrival of the settlers who established the first permanent settlement in this State. The stamp is printed in red and has for the central subject a reproduction of the two sailing vessels, the Ark and the Dove, on which the members of the colony came to America. The stamp was first placed on sale on March 23, 1934, at the post office in St. Marys City, Md., near the site of the first settlement.

The stamp in commemoration of the mothers of America was first placed on sale on May 2, 1934, at the post office in Washington, D. C. The stamp is printed in purple and includes in the central design a reproduction of the painting of his mother by the noted American artist, James Abbott McNeil Whistler.

The Wisconsin Tercentenary stamp was issued for the three-hundredth anniversary of the arrival in Green Bay of Jean Nicolet, the first white explorer, of record, to reach this territory. The stamp is printed in purple. The central subject depicts the arrival of the explorer, modeled from the painting entitled "Nicolet's Landing on the Shores of Green Bay", by Edwin Williard Deming. The Wisconsin Tercentenary stamp was first placed on sale at the post office in Green Bay, Wis., on July 7, 1934.

The set of national parks stamps represents the first series of stamps ever to be issued devoted exclusively to the portrayal of notable scenic wonders in this country. The issue when completed will consist of ten stamps in denominations of 1 cent to 10 cents, respectively, each depicting an outstanding scene from one of the national parks. The 1-cent stamp, the first to be issued, was placed

on sale on July 16, 1934, at the post offices in Yosemite National Park, Calif., and Washington, D. C. The stamp is green in color and shows a view from the Yosemite National Park. The remaining stamps of the series are to follow as rapidly as completed.

The special sheets of 1-cent and 3-cent stamps in multiples of 25 of the Century of Progress series were issued as a souvenir of the annual convention of the American Philatelic Society, held in Chicago, Ill., in August 1933. The sheets were first placed on sale at the Philatelic

Station, Chicago, Ill., on August 25, 1933.

The souvenir sheet containing six stamps of the 3-cent Little America issue was authorized on behalf of the National Stamp Exhibition of 1934 held at Rockefeller Center, New York, N. Y., February 10–18, 1934. The souvenir sheet was first placed on sale February 10, 1934, at the Branch Philatelic Agency operated in connection with the Convention.

To conform to the reduction in the postage rate on air-mail matter, effective July 1, 1934, provision was made for the issuance of air-mail stamps and stamped envelops in the 6-cent denomination. To meet the existing emergency the designs in use in connection with the 8-cent stamp were continued, the only alteration necessary being to change the denomination numerals from "8" to "6" and the color from purple to orange.

Although sales and registration of war-savings securities and active participation in redemption thereof have been discontinued for several years, a considerable amount of clerical time is still required to search records and adjust claims arising as a result of past activities of the Department in selling, registering, and accounting of these war-time

securities.

Under the act of Congress approved March 16, 1934, provision was made for the assessment of a Federal tax at the rate of \$1 per annum on hunters of migratory water fowl and the collection of such fee by means of an adhesive stamp affixed to the hunting license or a special certificate. The law further provides that the migratory-bird hunting stamp shall be sold through post offices, and gives to the Post Office Department complete jurisdiction of the printing, distribution, and sale of the stamp.

Immediately after the enactment of this legislation action was taken to provide the special stamp and printed forms required for use in connection with the sale of the stamp in post offices located in county seats, those located in cities having a population of 2,500 or more, as well as such other post offices as may be required to meet the public demand. It is estimated that approximately 14,000 post offices will be authorized to have the migratory-bird hunting stamp on sale, entailing a considerable amount of extra expense to the Department, for which reimbursement is to be made, as provided in the act, from the funds received from the sale of the special stamp.

The Philatelic Agency enjoyed the most profitable year's business since the establishment of this central agency in December 1921 for the sale of postage stamps of selected quality for collection use. The total sales for the year amounted to \$811,723, compared with \$302,619.54 for the previous fiscal year, a gain of 168 percent. This phenomenal advance in business is largely attributable to the constantly increasing interest that is being displayed in the collecting of postage stamps. The agency transacts a heavy business annually through direct window sale, but its primary service to collectors in general is through the filling of mail orders, which are received in increasing numbers from all parts of this country and from many foreign lands. The total number of mail orders handled by the agency was 96,710, compared with 35,185 orders filled during the previous year.

The yearly records of business transacted give proof that the Philatelic Agency is furnishing stamp collectors with needed service, which can not well be provided through local post offices.

A statement in detail of post-office transactions in postage stamps and internal-revenue stamps will be found in the appendix.

DIVISION OF REGISTERED MAILS

DOMESTIC REGISTRY, INSURANCE, AND COLLECT-ON-DELIVERY SERVICES

There was a decrease of 5.27 percent in the number of domestic paid registrations during the year as compared with the fiscal year 1933, an increase of 7.70 percent in free registrations, a decrease of 2.60 percent in the number of pieces of insured mail, and an increase of 7.73 percent in the number of c. o. d. articles mailed. The percentages of decreases in the number of pieces of paid registered and insured mail are much smaller than in the fiscal year 1933, when the percentage of decrease in registered mail was 23.37 percent, and the decrease in insured mail was 25.10 percent, as compared with 1932. This fact, together with the increase in c. o. d. business in the fiscal year 1934, indicates that the ebb in the registry and insurance services has probably been reached and that the trend in the future will be toward increases in these two services, as well as a further increase in the c. o. d. service.

An act of Congress was approved June 18, 1934, which authorized the Postmaster General, under such regulations as he might prescribe, to collect an additional fee of 10 cents for effecting the delivery of domestic registered, insured, and collect-on-delivery mail restricted in delivery to the addressee only or to the addressee or order. This additional charge was made effective on July 9, 1934.

The closing of the banks during the early spring of 1933, coupled with the inability of many addressees of collect-on-delivery mail to

obtain cash to meet their obligations, prompted the suspension of collection of demurrage charges on domestic collect-on-delivery mail, which was done beginning March 6, 1933, until further notice. In the belief that the conditions which prompted the suspension of demurrage had sufficiently subsided to permit the resumption of the collection of demurrage charges on domestic collect-on-delivery mail, the Postmaster General, under date of March 8, 1934, ordered these collections to be resumed effective July 1, 1934.

This is the second fiscal year during which collection of surcharges was made on registered mail, and insured mail treated as registered mail. Last year the total amount of surcharges collected was \$2,824,296.72. This year the surcharges amounted to \$2,859,566.52.

SPECIAL-DISCOUNT METHOD OF ADJUSTING INDEMNITY CLAIMS

Under special-discount arrangements some shippers of insured and collect-on-delivery mail agree, in the event of loss, rifling, or damage, to accept as indemnity the actual cost of the merchandise involved plus certain overhead charges, or the market or sale value less a fixed discount, and a considerable saving to the Department results in the adjustment of indemnity claims under these agreements.

STATISTICS

Statistics relating to domestic registered, insured, and collect-ondelivery mail will be found in tables 15 and 16 of the appendix.

DIVISION OF COST ASCERTAINMENT

The ascertainment of "the revenues derived from and the cost of carrying and handling the several classes of mail matter and of performing the special services" as authorized in section 214 of the act of February 28, 1925 (39 U. S. C. 826), was continued during the fiscal year 1934 substantially in accordance with the plans and methods previously pursued.

The purpose of the cost ascertainment is to allocate or apportion to each of the classes of mail matter and each of the special services the respective postal revenues and expenditures for the fiscal year, and summaries of the results for 1934 are shown in tables 17 to 21 of the

appendix to this report.

Included in the expenditures contributing to the computed distributable loss of \$54,461,714.80 appearing in these tables are certain nonpostal items identified in table 58, credit for which, under the act of June 9,1930, should be extended in all considerations relating to the finances of the Post Office Department. The application of these nonproductive and extraordinary items as credits against

the distributable loss for the year will indicate a net operating surplus, as follows:

	Revenue equivalent	Expense	Total
Distributable loss	\$23, 094, 882. 00		\$54, 461, 714. 80
Franked matter for— 1. Members of Congress— 2. Others than Members of Congress—	775, 785. 00 215. 00		
Total franked matter	776, 000. 00		
Publications going free in county————————————————————————————————————	545, 227. 00 103, 552. 00		
tional, scientific, philanthropic, agricultural, labor, and fra- ternal organizations. Excess cost of airplane service over the postage revenues de-	418, 100. 00		
rived from air mail		\$12, 992, 910. 83 28, 692, 458. 00

DIVISION OF PARCEL POST

The campaign to increase the volume, reduce expenses, and improve the Parcel Post Service is being carried on by this Division. At the 125 largest post offices specially qualified employees, designated "parcel-post supervisors", have been engaged in calling on the public and explaining in detail the Parcel Post Service, thereby increasing the volume of fourth-class mail and establishing a spirit of general cooperation and goodwill between mailers and the Postal Service.

Questionnaires have been sent to a comprehensive mailing list of patrons asking for criticisms of the Service and requesting suggestions as to how it may be improved. Information obtained from these sources discloses to the Department matters warranting inquiry and investigation and enables it to discover and correct the defects or to further improve existing service.

The Division continues to sponsor a weekly series of radio talks by postal officials and other prominent speakers on subjects pertaining to the Postal Service for the purpose of acquainting the public with general postal information and in order that they may use the Service to their best advantage.

Through the cooperation of the Federal Board for Vocational Education, the Agriculture Department, agricultural colleges, 4-H clubs, Future Farmers of America, and teacher-trainers in those organizations, the Division of Parcel Post is urging greater use of parcel post by residents on rural routes.

Other activities have been continued during the past year, such as furnishing publicity and educational copy to newspapers and magazines, addresses before civic and business organizations, conference talks with postal employees, convention groups, and supervisors, publication of postal information in telephone directories, and other general publicity and educational work.

BUREAU OF THE FOURTH ASSISTANT POSTMASTER GENERAL

On June 20, 1934, the emergency appropriation act was approved and provided \$65,000,000 for public-building projects, the funds to be administered jointly by the Treasury and Post Office Departments.

Immediately upon the approval of this act, the Secretary of the Treasury and Postmaster General selected 302 projects to be constructed and paid for out of that fund. Those projects were distributed throughout the country, and the necessary preliminary steps have already been taken to assure a speedy compliance with that part of the act which will provide for countrywide relief of unemployment.

DIVISION OF ENGINEERING AND RESEARCH

During the fiscal year 1934, detailed drawings of 71 leased quarters were prepared. Tentative plans were checked, so far as they related to post-office activities, of 186 Federal buildings. Cabinet sketches of 116 post offices and final plans and specifications of 137 projects were checked. Furniture and equipment requisitions were reviewed and lay-outs prepared for 101 buildings.

Interior lay-outs were planned of that portion of public buildings to be used for postal purposes, developing all space into efficient units with reference to the prompt and economical handling of mails and the activities related thereto.

Mechanical conveyor mail-handling equipment was designed and installed in a number of the larger post offices for the purpose of expediting the mails; also, improvements were devised and successfully used in the operation of several of the existing conveyor installations.

The shop details of 45 safes purchased by the Department were revised and the number of types of standard post-office safes reduced from 77 to 18. The shell-safe specifications and fireproof-safe specifications were also revised and lists prepared for the types of safes to be used in the various post offices.

Special research work on electric rates in large cities was conducted in cooperation with the Procurement Division of the Treasury Department, for the purpose of reducing electrical costs and to insure economy in the purchase of electricity in the operation of Federal-building and other post-office activities.

DIVISION OF POST OFFICE QUARTERS

Quarters for post offices of the first, second, and third classes, and stations and branches thereof, are provided under lease in the case of the larger post offices and on a month-to-month rental basis for the smaller post offices; quarters are also provided in Federal buildings. Lease contracts in most cases include rent, light, fuel, water, and equipment, and are usually for terms of 5 or 10 years.

There were 14,110 Presidential post offices and 1,487 classified stations and branches on June 30, 1934, a total of 15,597. Quarters for these post offices, stations, and branches are provided as follows:

CLASSIFICATION

Leased quarters, post offices	4, 941
Leased quarters, stations, and branches	1, 330
Rented quarters (month-to-month) post offices	7, 514
Rented quarters (month-to-month), stations, and branches	. 77
Federal buildings, post offices	
Federal buildings, stations, and branches	
Free quarters, military reservation stations	
Free quarters, post offices	
Free quarters, stations	
Total	15, 597

The appropriation for 1934 was \$16,000,000. Expenditures from this appropriation were made as follows:

Rental of quarte	rs (month-to-month)	for post	offices,	stations,	
branches, and r	niscellaneous				1, 944, 008
				The state of the	

Toogs of quarters for nost offices stations and branches

Total expenditures ______ 15, 457, 262

During the fiscal year 1934, 710 leases were negotiated, of which 701 were new leases to replace expiring leases, or renewals of leases which had expired during the year, and 9 covered new quarters. The renewed leases provided an aggregate of 1,569,812 square feet of floor space at an annual rental of \$1,145,163, equivalent to 73 cents per square foot. This was a decrease of 20 percent of the cost of expiring leases.

The nine new projects provided for 13,671 square feet of floor space at an annual rental of \$9,160, or at the rate of 67 cents per square foot.

REDUCTION OF RENT AT RENTAL OFFICES

The cost of rent, light, and fuel in buildings occupied on a month-to-month rental basis was reduced at 2,843 offices during 1934 as a result of a further effort to effect economies wherever possible in the Postal Service, reflecting a saving of \$143,983.

REDUCTION IN COST OF LIGHT AND FUEL

During the fiscal year 1934 reduction in allowances for light and fuel for quarters occupied by post offices, stations, and branches, totalling \$100,528, resulted from efforts to confine the use of artificial light and fuel to the minimum required for efficient service.

GARAGES

On June 30, 1934, there were 119 garages under lease for housing trucks used in the motor-vehicle service and at 1,255 additional offices garage space was occupied on a month-to-month rental basis. One garage is located in a Federal building. The rental of garage quarters under lease aggregated \$1,258,947, and those on a monthly basis \$134,253, making a total of \$1,393,200.

DIVISION OF MOTOR-VEHICLE SERVICE

The expenditures during the year for vehicle service in cities, including the operation of Government-owned motor-vehicle service, aggregated \$12,395,229, which is \$1,278,411 less than was expended in 1933. This reduction represents savings accomplished as the result of suspension of administrative and automatic promotions, lapsing of vacancies, pay reductions, administrative furloughs, and operating economies.

GOVERNMENT-OWNED MOTOR-VEHICLE SERVICE

The cost of maintenance and operation of the Government-owned motor-vehicle service amounted to \$9,886,689, which is \$679,671 less than in 1933. Service was extended to 41 additional cities and at the close of the year trucks owned and maintained by the Postal Service were in operation at 1,387 points. The collection, relay, and delivery of mail in 1,259 cities was performed exclusively with trucks owned by the Department, while at the remaining 128 points Government-owned vehicles were also used for mail transportation between post offices, postal stations, depots, and other mail-handling units.

On June 30, 1934, there were in service 8,000 trucks owned by the Department, while the personnel of the Government-owned motor-vehicle service numbered 3,945, a decrease of 17 trucks and 232 employees during the year.

The cost of operating Government-owned trucks has been decreased from 87 cents per hour in 1921 to 41.4 cents in 1934, without driver and without deducting the saving resulting from the furlough and pay reduction in effect throughout the year.

The Department maintains repair shops at 30 conveniently located points throughout the country for reconditioning trucks as the need therefor arises, and where automobiles owned by other branches of the Federal service are repaired and serviced from time to time. These repair plants also serve to some extent as supply bases for the motor-vehicle service units located in the same area.

CONTRACT VEHICLE SERVICE

The expenditures for contract vehicle service during the year included \$1,128,874 under 4-year contracts, \$962,365 for vehicles hired on an annual basis, and \$417,301 for vehicles secured on an hourly basis, under quarterly agreements, making a total of \$2,508,540 which is \$598,740 less than was expended for contract service in 1933.

New contracts were entered into for vehicle service for the 4-year period beginning July 1, 1934, at 46 out of 52 cities where contracts expired June 30, 1934. The aggregate annual cost under the new contracts is \$247,406, as compared with a yearly cost of \$392,799 under the expired contracts. The saving effected under this reletting amounts to \$145,393 a year, or 37.01 percent.

At the six remaining cities temporary arrangements have been made for continuation of the service at an aggregate annual rate of \$58,466, effective July 1, 1934, as compared with \$81,120, the cost under the former contracts, a reduction of \$22,654 per annum, or 27.92 percent.

Vehicle service covered by 4-year contracts is in operation in 185 cities. These contracts provide for the transportation of mail between the post office, postal stations, railroad stations, and other mail-handling points and in a few instances include the furnishing of vehicles for use in the City Delivery Service. At the close of the fiscal year, 503 trucks were used under 4-year contracts, and in addition the contractors were furnishing 13 trucks for use in the City Delivery Service.

On June 30, 1934, there were in operation 1,486 trucks and 160 horse-drawn wagons secured on a rental basis under informal contract, for use in 805 cities. There were also hired during the year, on a quarterly basis, by the hour, the equivalent of 561 trucks, 8 hours per day, 306 days per year.

At the close of the fiscal year, 2,723 vehicles were under hire by the Postal Service, of which 516 were being used in the performance of 4-year contract service, leaving 2,207 for collection and delivery service.

PNEUMATIC TUBE SERVICE

New York, N. Y.—Double lines of 8-inch pneumatic tubes, providing an expeditious transmission of mail between 4 a. m. and 11

p. m., connect the main post office in New York City, 22 of the larger postal stations on Manhattan Island, and the general post office in Brooklyn. The tube system is approximately 26.5 miles in length and is under contract for a period of 2 years from July 1, 1932, with provision for three 1-year extensions, at a rental of \$19,500 per mile per annum, which includes all expense incident to its maintenance and operation. Approximately 55 percent of the letter mail and a limited amount of other classes is dispatched through the tubes. The contract has been extended until June 30, 1935.

Boston, Mass.—The tube system in Boston, connecting the North and South Railroad Stations via South Postal Station, is approximately 1.8 miles in length and is under contract until June 30, 1936, at a rental of \$24,000 a year.

MISCELLANEOUS

Revision of the overhauling and truck rebuilding program heretofore in effect, has reduced maintenance costs and the amount of replacement truck parts required, without impairment of efficiency or serviceability of the trucks.

Investigations have been and are being made at the larger units with a view to determining the actual man-power requirements under this revised program. Investigations made to date, have disclosed a surplus of employees, whose services are now being utilized in other capacities.

The transportation service, Government-owned and contract, are being closely supervised with a view to effecting additional economies during the fiscal year 1935.

DIVISION OF BUILDING OPERATIONS AND SUPPLIES

EQUIPMENT AND SUPPLIES BRANCH

There was available through direct appropriations and allotments for the purchase of equipment and supplies a total of \$3,906,500. There was expended from these funds \$2,485,954.86 or \$1,420,545.14 less than the amount available for that purpose.

A comparison of a few items furnished the service illustrates some reductions made and reflects the savings effected:

Item	Purchased in 1933	Purchased in 1934
Letter box posts Rural carrier distributing cases. Time recorders. Mechanical pick-up tables. Adding machines Typewriters Platform trucks.	2, 980 431 200 7 469 448 374	1, 250 268 60 None 98 178 29

There were received a total of 124,018 requisitions for postal supplies, an increase of 2,890 over the preceding year. Requisitions from the smaller offices were submitted direct to the 55 distributing offices in the field operating under the direction of this office. Miscellaneous postal supplies amounting to 1,687 tons were hauled to and from the local freight yards and docks.

During the year complete screen partition and furniture equipment was installed in 80 offices and stations at a cost of \$119,484.47, thus continuing the policy of providing Government-owned equipment where it is in the interest of economy to do so. All Department-owned equipment becoming available as a result of offices moving into Federal buildings from leased quarters was transferred to offices for which it would have been necessary to purchase new equipment.

The following items purchased and distributed indicate the requirements of the Service:

Domestic and international money orders Official envelops and registry jackets	222, 454, 025 114, 413, 420
Postal-savings certificates	19, 116, 500
Postmarking, money order, registry, dating, and miscellaneous	
stamps	137, 000
Facing slips	735, 681, 300
Strip labels	544, 095, 650
International service labels	1, 036, 950
Gallons of cylinder oil	238, 980
Gallons of transmission oil	6, 043
Pounds of grease	43, 176
Tires	. 5, 115
Tubes	6, 174

Shortly before the close of the fiscal year arrangements were made with the Treasury Department whereby approximately 84,000 used key-type lock boxes formerly used in Federal buildings were transferred to this Department. After rehabilitation, these lock boxes will be used in rented and leased quarters, effecting material economies.

MAINTENANCE BRANCH

Pursuant to the provisions of Executive Order No. 6166, dated June 10, 1933, modified by order no. 6244, dated July 27, 1933, and in accordance with an order of the Secretary of the Treasury approved by the President on September 25, 1933, the administration of Government-owned post-office buildings was transferred from the Treasury Department to the Post Office Department on October 1, 1933.

For the administration of these buildings for the 9 months from October 1, 1933, to June 30, 1934, there was transferred from appropriations under the control of the Secretary of the Treasury to appropriations under the control of the Postmaster General a total of \$9.895.311.19.

At the time this transfer was made there were 1,569 buildings occupied, requiring a total force of 7,352 employees for their maintenance and operation. Since October 1, 68 new and additional buildings have been commissioned, 27 new ones replacing old buildings which were closed, and 14 extensions. At the close of business June 30, 1934, the Department was operating 1,637 Government-owned buildings, necessitating a force of 8,781 employees. The annual pay roll of this force was \$10,286,943.69.

Prior to the transfer of these buildings to the control of the Post Office Department, one central storehouse was maintained in Washington, from which miscellaneous cleaning supplies and tools were distributed to the various buildings. Subsequent to the transfer warehouses were established in Chicago and New York and this has greatly facilitated the handling of supplies and has made possible an appreciable saving in the cost of transporting these commodities to the various buildings.

By careful examination of requisitions from postmasters for additional equipment for activities housed in these buildings and the use and transfer of furniture and equipment surplus to meet the needs of certain activities in various locations, the Department has been able to make a substantial saving in the expenditure of public funds incident to equipping these offices. The sum of \$305,000 of the total appropriation of \$1,161,518.50 was saved by this policy.

The simplification and standardization of drawings and specifications for safes by the Division of Engineering and Research resulted in a saving of about 50 percent of the cost of similar equipment furnished during previous fiscal years.

During the fiscal year 1934 a number of emergency activities, established under legislation enacted by the last Congress, have been accommodated in Federal buildings. During the period October 1, 1933, to June 30, 1934, reassignments of space in the various buildings permitted the Department to accommodate in Federal buildings activities which had planned to occupy or were occupying commercial space, with a resultant saving to the various organizations of the sum of \$44,738.

During the 9-month period in which these buildings were under the jurisdiction of this Department there was expended \$9,091,000 for their operation and maintenance. This is \$804,000 less than the amount transferred from the Treasury Department for this purpose.

MANUFACTURING AND REPAIRS BRANCH

The manufacture of new equipment during the past year was further curtailed, the number of new mail bags and locks supplied the Service being the smallest in more than a score of years. The reduced pro-

duction did not necessitate the dismissal of any of the personnel, as no vacancies have been filled during the last 4 years and separations through retirement, resignations, etc., kept pace with the work.

The principal articles manufactured were 349,617 mail bags, 250,000 LA locks, 4,150 rotary locks, 15,000 Arrow locks, and 724,000

locking-cord fasteners.

Repair work included 74,618 locks, 1,970 numbering machines, 161 canceling machines, 489 motors, as well as reconditioning 2,257,496 old mail containers. It was necessary to condemn 435,430 old bags, 3,300 LA, 678 Arrow, and 4,063 rotary locks.

By fitting 285,279 old bags with new bottoms and converting 101.777 old no. 2 sacks into no. 3 sacks, 387,056 bags, which otherwise

would have been condemned, were restored to service.

An experimental lot of 15 asbestos bags was made for use in the Air Mail Service. Catcher pouches, which are subjected to very severe strain, have been improved and strengthened by binding the bottoms with leather. Experiments were also conducted looking to the possible rehabilitation of old post-office lock boxes. It was found that a saving could be effected by the manufacture of furniture tags in the shops, and that work has been undertaken. Four special types of stackers for use in connection with 5 inch wide letter belt distribution systems were also manufactured for use in post offices.

Savings effected through the salvage and sale of scrap materials

amounted to \$93,800.

The appropriation for the fiscal year was \$900,000, of which amount only \$682,414 was expended.

DIVISION OF TOPOGRAPHY

During the year, 22,284 post-route maps were distributed, and in addition 6,042 county and 26,513 local-center maps showing rural delivery service were printed. There were sold to the public 729 post-route maps, 5,244 county maps, and 280 local-center maps. The amount received from the sale of these maps was \$3,602.40.

In addition, 41,031 miscellaneous blueprints, negatives, and photostats were made for the service, and 29,792 zone keys for use in the

operation of the Parcel Post System were supplied.

DIVISION OF TRAFFIC

During the year there were 414 carload shipments and 6,115 less-than-carload shipments of postal supplies and equipment, or 29,867,094 pounds of freight and express, transported at a cost of \$181,766.16, an average cost of \$0.60858 per 100 pounds, as compared with \$0.66 last year. The decrease in cost per 100 pounds may be attributed to the consolidation of less-than-carload shipments into carloads and the securing of special rates.

In addition, during the last three quarters of the fiscal year there were 95 carload shipments and 3,625 less-than-carload shipments of custodial supplies and equipment, or 5,093,627 pounds of freight and express, transported at a cost of \$61,294.96, an average cost of \$1.20336 per 100 pounds. No comparison of average cost with last year may be made, as this is a new activity.

The consolidation of less-than-carload shipments into carloads; merger of postal cards and supplies as mixed carloads; use of mailstorage space wherever available; driving chassis overland, instead of shipping by freight; obtaining special, reduced rates; and negotiation

of reasonable drayage rates effected a saving of \$34,986.82.

OFFICE OF THE SOLICITOR

FRAUDULENT ENTERPRISES

Proceeding under the provisions of title 39, United States Code, sections 259 and 732, and also on special cases under the provisions of title 18, United States Code, section 336, the Department, during the last year, took action against numerous persons and concerns who obtained and attempted to obtain money and property through the mails by means of false and fraudulent pretenses, representations, and promises.

The dishonest schemes with which the Department was called upon to deal were remarkable for the variety of their approach and the ingenuity of their appeal to the victims. The incomplete data secured by the Department in the process of investigating and handling these cases relative to the amounts of money obtained by dishonest persons and concerns through the mails makes it impracticable to even approximate the total sum. However, the figures which are available indicate that it is a very large amount, and in several instances individuals parted with large sums of money in response to solicitations of a fraudulent character. This was particularly true in cases where hopes and promises were held out to the remitters of enormous profits to be quickly realized. Particularly was this true in the sale of interests in oil leases and royalties. However, these dishonest promoters of oil-land selling schemes have greatly diminished in number and have become greatly circumscribed in their activities due to the fact that the Department gives special handling to such cases to insure expeditious closing of the mails against the fraudulent promoters. However, many drillers of wildcat oil wells in territories long since explored, and the production possibility of which had been definitely established as being very low, interested a large number of investors upon pretenses that their wells would almost certainly develop into monster gushers. In practically every case where the well was carried to completion nothing more valuable than salt water was obtained, while in a few cases small amounts of gas or oil were encountered in the drilling which were of no commercial value and to market which no facilities were available or no attempt was made by the persons operating these enterprises. In none of these cases did the investors secure as much as a dollar's return on their investment and the only profits that accrued were obtained by the persons who secured the remittances.

More cases involving patent-medicine quackery were successfully handled by the Department during the past year than in any preceding year. The schemes against which action was taken were of the usual variety and character, but were more skillfully conducted in a great many instances than similar schemes have been in the past. As noted in previous reports, there is still a large class of people who, despite widespread information on the subject, are still prone to rely upon advertisements which promise rejuvenation by means of nostrums or so-called gland treatments, and who hope and believe apparently that in some mysterious way youthful vigor and vitality will be restored to them despite the natural limitations of advancing years and chronic disease conditions. Such persons always provide a ready market for the purveyors of worthless drug preparations advertised as practically sure rejuvenators. Persons suffering from chronic or incurable maladies and diseases also fall easy victims to extravagant representations as to the values of drugs sold for the purpose of curing conditions which are either incurable or can be dealt with successfully only by means of surgery. The remarkable feature of these medical schemes is that the promoters invariably have received large numbers of testimonials from persons who appear to believe that they have been rejuvenated or revitalized or cured of their condition, whatever it may be, and regardless of the proven therapeutic inapplicability of the concoctions which they have taken. Some of these preparations were found to be actually dangerous to the users, and it was shown in certain instances that they caused several deaths. By its prompt action in denying the use of the mails to the operators of such dishonest medical schemes the Department has undoubtedly saved not only the money but also the lives of many persons.

LOTTERIES

Section 213 of the United States Penal Code (18 U. S. C. 336) provides that all matter relating to lotteries, gift enterprises, and schemes of any kind in which prizes are offered dependent in whole or in part upon lot or chance shall not be transmitted in the mails, and directs that such matter be excluded or withdrawn by postmasters.

Prize contests designed for the purpose of stimulating sales and increasing circulation lists found much favor with business concerns and newspapers in all parts of the country, and the Department was called upon to issue thousands of rulings to postmasters for their information and guidance in the proper treatment of mail matter.

The campaign instituted by the Department to deny the use of the mails to the operators of foreign sweepstakes drawings has resulted in a marked decrease during the past year in the quantity of tickets and literature which the promoters of the largest of these lotteries have sought to forward through the mails to residents of the United States. Several of these enterprises operated on a small scale have been particularly active in their efforts to get their advertisements and tickets

into the hands of United States citizens through the use of the mails. However, the Department in cooperation with the Customs Service confiscated millions of these tickets. Furthermore, fraud orders were promptly issued forbidding the forwarding of mail matter and the issuance, certification, and payment of money orders intended for these foreign lottery agents.

OBSCENE AND SCURRILOUS MATTER

During the past year the Department has endeavored to rid the mails of indecent matter by the vigorous enforcement of section 211 of the United States Penal Code (18 U. S. C. 334) which prohibits the transmission in the mails of any matter of an indecent, obscene, lewd, lascivious, or filthy character. As a result of this action the number of periodicals with indecent contents sought to be mailed have decreased notably. Whenever matter of an obscene character was found in the mails, it was disposed of as unmailable under the law.

Foreign dealers continued to send considerable literature advertising obscene books and pictures to this country, but the greater portion of these advertisements were confiscated by the Department through the cooperation of the Customs Service. In addition, orders were issued against persons or concerns abroad engaged in advertising their obscene wares in the United States which prevented them from receiving mail from this country and also stopped the certification of money orders drawn in their favor.

Undoubtedly much obscene matter is transported by facilities other than the mails, and it is again emphasized that the rigid enforcement of State laws forbidding the sale and display of indecent publications and pictures would do much to help rid the field of such objectionable matter.

CLAIMS OF POSTMASTERS FOR CREDIT OR REIMBURSEMENT ON ACCOUNT OF UNAVOIDABLE LOSSES

Under the provisions of title 39, United States Code, section 49, the Postmaster General is authorized to reimburse postmasters or to allow them credit in their accounts in sums not exceeding \$10,000 for public funds and stamp supplies lost by burglary, fire, or other unavoidable casualty, or in transit to designated depositaries, if the loss resulted from no fault or negligence on their part. The act of Congress of June 18, 1934, (Public, No. 386), amended the law cited to include internal revenue funds and stamps, Federal migratory bird hunting funds and stamps, funds lost by bank failure, and funds and stamp stock lost in transit. By the Postal Laws and Regulations the Solicitor is charged with consideration and submission to the Postmaster General of all claims of this character with such advice as to disposition as the facts in each case appear to require. On July 1, 1933, there were

582 claims pending, and 1,131 were received during the year, making the total for consideration 1,713. Of this number 1,146 were adjudicated during the year, leaving 567 pending. Of the claims disposed of 761 were allowed in whole or in part. In 313 cases it was necessary to deny credit because of negligence with respect to the protection afforded the public funds and stamp supplies, or with respect to the deposit of surplus funds in the manner or at the time designated, in violation of sections 106, 111, and 117 of the Postal Laws and Regulations, as the disregarding by postmasters of applicable regulations is construed as constituting negligence precluding allowance of credit. Recovery of the money or stamps made it possible to dismiss 52 claims. and 20 claims aggregating \$569.91 were voluntarily withdrawn by the claimants. The total credits authorized, classified to show the number of claims, the cause of loss, and the amount involved in the several funds and stamp supplies, and the same particulars in disallowed and dismissed claims are set forth in the tabular statements following:

			Champ				
Cause of loss	Number	Postal	Money order	Postal savings	Customs	Stamp stock	Total
Allowed:							
Burglary	390	\$10, 232. 02	\$11, 350. 67	\$61.40		\$89, 561. 47	1 \$111, 205. 56

Flood, accident	1					. 92	. 92
Total	52	1, 603. 06	6, 518. 23	3, 860. 00		248. 05	12, 229. 34

¹ Includes \$28,022 allowed by a special act of Congress.
² The difference between these totals and those shown in the appendix is due to the fact that some of the credits authorized have not been allowed in the accounts as of the same fiscal year.

Claims in excess of \$10,000.—No claim involving a loss of more than \$10,000 has been received during the year. In compliance with the law hereinbefore cited, the facts relating to the claim of the postmaster at Seattle, Wash., on account of \$29,082.30 in postal funds lost by robbery and embezzlement, December 23, 1931, have been reported to Congress with the recommendation for authority to allow credit for \$15,997.66, the net loss after recovery of \$13,084.64. The

claim of the postmaster at Asbury Park, N. J., on account of \$28,022 in money and postage stamps lost in the burglary, July 6, 1929, was allowed by special act of Congress approved June 11, 1934 (Private, No. 217). As no action has been taken by Congress on the following claims favorably reported at various times on account of losses by burglary, the recommendation for authority to allow credit in each case is renewed in order to relieve the respective postmasters and their sureties of liability:

Office	Office Date Name of postmas		Amount	Date reported to Congress	
De Kalb, Ill. Fort Myers, Fla. Hanover, Pa. Macomb, Ill. Oxford, N. C	Feb. 10, 1931 Mar. 10, 1918 Feb. 4, 1919 Apr. 5, 1929 Mar. 9, 1920	Thomas F. Olsen Corinne T. Summerlin E. K. Eichelberger James M. Pace Ben K. Lassiter	\$18, 687. 19 13, 626. 72 14, 221. 36 21, 643. 04 33, 345. 13	Apr. 1, 1931 Jan. 7, 1921 Aug. 4, 1919 Dec. 14, 1929 Nov. 20, 1920	

CLAIMS FOR PAYMENT FOR DAMAGE TO PERSON AND PROPERTY

Claims in the number of 1,999 were received in the Department during the year for consideration under the provisions of the acts of Congress of June 16, 1921 (5 U. S. C. 392), and December 28, 1922 (31 U. S. C. 215–217). The Department is authorized by these acts to adjust and pay, or recommend for payment, claims for personal injuries and property damage. Claims coming within the purview of the earlier act are paid direct by the Department, whereas claims handled under the later act are required to be certified to Congress for an appropriation for their payment.

This class of claims arises largely out of accidents involving Government-owned mail trucks in the larger cities. There were 433 claims pending at the beginning of the fiscal year, either under investigation or awaiting claimants' compliance with the requirements of the Department. Final disposition was made of 1,835 claims, of which 1,083, amounting to \$28,232.46, were approved and paid; 576, aggregating \$275,811.37, were disallowed; and 176 claims were closed out during the year either because the claimants withdrew their claims or failed to perfect them.

There remain 597 cases still under consideration, many being held in abeyance awaiting some necessary steps on the part of claimants. In addition to the foregoing, 335 reports relating to accidents have been filed with the Department during the past fiscal year in which no claims for damages have yet been made.

POSTAL SAVINGS SECURITY EXAMINATION

The Board of Trustees of the Postal Savings System is required by section 759 of title 39, United States Code, to take from banks which are designated depositories for Postal Savings funds only "security in public bonds or other securities, authorized by act of Congress or supported by the taxing power." During the fiscal year just ended 956 bond issues were examined with respect to their legal acceptability as security for deposits of Postal Savings funds. These represented bonds of 31 of the States themselves; bonds of municipalities and other political divisions located in 44 States; and bonds of Hawaii and Puerto Rico, as well as bonds of municipalities in Puerto Rico guaranteed by the people of Puerto Rico.

At the beginning of the fiscal year there were 50 issues on hand. During the year 906 were received, making a total of 956, of which number 842 were approved as legally acceptable, 28 were held to be not legally acceptable, and 53 issues were withdrawn by the tendering banks involved before any decision could be rendered. Thirteen cases represented duplicates. One case was returned by reason of the failure of the tendering bank to furnish the necessary legal information. Nineteen cases remained on hand at the end of the fiscal year.

The uniform requirements maintained by this office in connection with the legal examination of bonds tendered as Postal Savings security have undoubtedly resulted in affording the Government protection from a flood of low-grade bonds and in maintaining the general high standard of securities offered as collateral for Postal Savings funds.

GOVERNMENT MONOPOLY OF THE TRANSPORTATION OF MAIL

During the past year there was a notable increase in the number of cases coming before the Department for decision under the provisions of sections 1710 to 1715 of the Postal Laws and Regulations of 1932, embracing the so-called private express statutes. These statutes, which vest the Post Office Department with a monopoly of the transportation of letters, are little understood and often misinterpreted

by the public.

Private individuals, public-utility companies, and large business concerns, claiming to be unfamiliar with the provisions of the private express statutes, initiated practices during the past year whereby they sought to deliver their letters by private "contract" carriers outside the mails without the payment of any postage. Prompt action by the Department in calling to the attention of such individuals and concerns the illegality of this practice has resulted in the diversion to the proper postal channels of great quantities of mail matter, with a material increase in postal revenues.

The primary purpose of the private express statutes is to safeguard the revenues of the Post Office Department. Though perhaps, strictly speaking, not primarily designed nor adapted to carry out that purpose, yet achieving important results through augmenting the effectiveness of these statutes in accomplishing such purpose, is the order of the Postmaster General of January 2, 1934. This order emphasizes that all private mail receptacles are to be used exclusively

for the reception and delivery of matter regularly in the mails, and authorizes postal carriers to take up and return to the post office to be held for postage any mailable matter found deposited in such receptacles on which no postage has been paid. The practical effect of this regulation has been to bring back into postal channels matter such as statements of account, circulars, sales bills, and like matter, heretofore delivered by private messengers. The effectiveness of this regulation is made complete by act of Congress approved May 7, 1934 (18 U. S. C. 321) which subjects any person or concern, who knowingly deposits any mailable matter, on which no postage has been paid, in any private mail receptacle with intent to avoid payment of lawful postage thereon, to a fine of \$300.

Of like efficacy in accomplishing a material increase in postal receipts is the recent amendment to section 1711 of the Postal Laws and Regulations of 1932, enacted by the last Congress upon the recommendation of the Department. Aimed to suppress the then prevalent practice of many business houses and public utilities of distribution of their private mail by contract private messengers, this law (18 U.S. C. 309, as amended), limits to 25 the number of letters that may be transmitted outside the mails without the payment of postage by special messenger employed for the particular occasion only.

With a view to bringing to the attention of employees of the Post Office Department and the public generally the requirements of the private express statutes, the Department has prepared a pamphlet containing some of the outstanding and fundamental principles which control it in the decision of questions arising under these statutes. This pamphlet will be distributed throughout the country, and it is believed a marked decrease in the number of violations of these statutes will result from this step.

OFFICE OF THE CHIEF INSPECTOR

New legislation and the efforts of the Department to prevent postal expenditures from greatly exceeding the postal revenues resulted in unprecedented demands upon the Post Office Inspection Service for special and immediate investigations. Many of the investigations which had as their object economies in postal operations were Nation-wide in their scope and to complete them in time for the Department to receive the maximum benefit therefrom necessitated the withdrawal of large groups of inspectors from their regular duties and their assignment to this special work. Some of the special investigations are listed below:

Investigation to determine the quota of employees necessary to conduct the service in the larger post offices and to ascertain which employees should be separated from the Service on account of the 30-year retirement law or on account of the marital clause of the

Economy Act.

Rearrangement and consolidation of rural routes in connection with the retirement of rural carriers under the 30-year retirement law.

Investigation of the star-route service with a view to the discontinuance of unnecessary routes and the rearrangement of those remaining in operation.

Investigation to determine the efficiency of custodial employees in Government buildings under the jurisdiction of the Post Office

A general survey of the motor-vehicle service.

Completion of the survey of the Post Office Department begun in May 1933, which resulted in the elimination of unnecessary positions and changes in organization and practices which produced savings in excess of \$400,000. Approximately 20 inspectors devoted their full time to this investigation for a period of about 3 months in the fiscal year 1934.

Other special investigations to which a great deal of time was

devoted by inspectors were:

Parcel-post shipments by certain fourth-class postmasters of eggs and other produce for the purpose of increasing their compensation. Investigation of this subject at more than 1,000 fourth-class post offices resulted in the recovery from such postmasters of \$25,480.12 and in recommendations by inspectors for the removal of the postmaster or the discontinuance of the office in 191 cases. Further recoveries from these postmasters of amounts fraudulently claimed as compensation are under consideration.

A campaign to put an end to the transportation and delivery of letters by outside agencies in violation of the private-express statutes, which vest in the Post Office Department an absolute monopoly of the transportation of letters and packets of letters by regular trips or at stated intervals over all post routes. Investigations completed and in progress have established wide-spread violations of this statute which are costing the Government hundreds of thousands of dollars in revenue annually.

Investigations by inspectors in the capacity of site agents to select the sites for more than 200 Federal buildings.

Investigations of air-mail contracts beginning on December 5, 1933, and still in progress. Inspectors have been continuously employed on this investigation.

Investigation of ocean-mail contracts begun about October 1, 1933, and still in progress. Inspectors have been continuously employed on this investigation.

The assumption by the War Department temporarily of the transportation of air mail necessitated more than 50 special investigations by inspectors at points throughout the United States.

Postal savings and other official funds belonging to a large number of post offices throughout the country were tied up in banks which had failed and closed their doors. An investigation by an inspector resulted in the recovery of more than \$335,000 of these funds.

Unceasing efforts were made during the fiscal year to improve the efficiency of the inspection service and to effect economies in its operation. With this object in view improved methods were put into operation for—

- 1. Detecting the mishandling of funds collected on c. o. d. parcels.
- 2. Detecting and apprehending persons committing depredations upon the mails.
 - 3. The inspection of stations and branch post offices.
 - 4. Determining the relative efficiency of post-office inspectors.

CRIMINAL INVESTIGATIONS

The year was marked by the successful conclusion of an unusually large number of important criminal cases. Included in this group were:

The apprehension and conviction of bandits who committed mail robberies during the fiscal year 1934 and the latter part of the fiscal year 1933 at Fort Worth, Tex., Minneapolis, Minn., Sacramento, Calif., Salt Lake City, Utah, Charlotte, N. C., Washington, D. C., and Richmond, Va. The losses in these robberies aggregated \$512,313.30, more than half of which has been recovered.

The continuation of a campaign against oil-fraud promoters in the State of Texas resulted in the arrest and conviction of 104 persons

who received sentences aggregating more than 250 years in prison and upon whom fines were imposed in the amount of \$6,000. It is estimated that this group of swindlers have filched from the public more than \$26,000,000 during the period they have been operating.

For a good many years some of the residents of certain localities have openly flouted the mail-fraud statute by repeatedly ordering merchandise from mail-order concerns and paying for it with "no account" checks. Conditions became so bad that mail-order concerns would not ship merchandise to these localities until the checks sent in payment had cleared through the banks. Early in the fiscal year two inspectors were sent to these localities to clean up the situation and by the end of the fiscal year they had caused a total of 184 arrests, and had secured 176 convictions on the charge of sending worthless checks through the mails in furtherance of a scheme to Pefraud.

Arrest and conviction of one Oscar M. Hartzell, the principal in a gigantic mail-fraud scheme known as the "Sir Francis Drake Estate." Hartzell resided in London, England, and for many years has defrauded the unsuspecting public out of millions of dollars upon the representation that contributors to his scheme would be permitted to participate in a division of large holdings belonging to the heirs of

Sir Francis Drake.

Investigations by inspectors of violations of the act of July 8, 1932, resulted in the conviction of 161 persons on the charge of sending letters of extortion through the mails.

NEED FOR ADDITIONAL INSPECTORS

The constantly increasing demands upon this Service for investigations designed to promote economies in the operation of the Postal Service and for other investigations of a special character have made it impossible for inspectors to keep abreast of their regular work. Notwithstanding an increased output in the number of investigations made, the Inspection Service found itself 3,672 cases further behind at the end of the fiscal year 1934 than it was at the end of the fiscal year 1933. A comparative statement for the 2 fiscal years is shown below:

	1933	1934	Increase
Cases issued. Cases closed. On hand close of year.	89, 421	100, 187	10, 766
	89, 434	96, 515	6, 079
	15, 749	19, 421	3, 672

There is every indication that the future will bring still greater demands upon the Inspection Service both from the public and from the administrative officers of the Post Office Department. New criminal statutes and the determination of the Department to reduce the expense of postal operations to the minimum will necessitate many additional investigations. The undue postponement of needed investigations brings justifiable complaint from the public and delays the inauguration by the Department of money-saving policies and practices. It is believed that at least 50 additional inspectors will be needed to keep the work in a reasonably current condition.

CLASSIFICATION OF INSPECTORS

Post-office inspectors at present, like other employees of the Postal Service, receive automatic promotions. The automatic promotion system is not adapted to the position of post-office inspector for the reason that under it there is not a sufficient range of salary grades between inspectors of limited experience and those of greater experience and outstanding attainments. The same amount of money distributed to grades in accordance with a proper classification system will compensate inspectors more nearly in proportion to the value of their individual services. This would be in harmony with the organization of other investigative agencies of the Federal Government.

SUMMARY OF WORK

The work performed during the year and on hand at the end of the year is summarized in the following table:

	Investiga- tions made	Uninvestigated June 30, 1934
Loss, rifling, theft, damage, and other mistreatment of registered mail. Charges against employees, wrong payment of money orders, and miscellaneous complaints. Robberies, fires, accidents and other casualties. Mailing of obscene, scurrilous, and other prohibited matter. Use of the mails in schemes to defraud. Special matters handled under personal direction of Ohief Inspector. Regular inspections of post offices (including auditing of accounts). Investigating and leasing of post-office quarters. Parcel post irregularities. Claims for reward. Rural service. Clerical and carrier needs and survey of postal units.	4, 403 22, 154 17, 168 14, 961 508 373 32, 880 2, 840 3, 966 316 6, 641 305	855 5, 003 6, 034 1 2, 505 528 5 70 1, 383 1, 175 41 1, 027 157
Total	96, 515	19, 421

¹ Includes fraud cases issued prior to February 1, 1934.

In addition to the above, 286,396 complaints of the loss and rifling of ordinary domestic mail were reported, an increase of 43,899 over 1933. Reported losses of foreign mail, registered and ordinary, amounted to 19,935 as compared with 25,911 during the preceding fiscal year.

The number of cases in the hands of inspectors at the close of the year was 19,421 as against 15,749 for the fiscal year 1933.

COLLECTIONS

Collections aggregating \$678,435.03 were made by the Office of the Chief Inspector and by inspectors in the field from mail robbers, burglars, money-order forgers, sureties, steamship companies, and other carriers and from persons who knowingly or otherwise received stolen government funds or property or valuables not intended for them.

CRIMINAL WORK

The number of persons arrested charged with violations of the postal laws was 3,728. Of this number, 591 were employees of the Postal Service. Indictments were returned against 3,273 postal law violators and, including those obtained upon indictments returned during previous years, there were 3,041 convictions. The number of persons arrested, indicted, and convicted for each of the different classes of postal offenses is shown in the table below:

Character of crime	Arrests	Indict- ments	Convic- tions
Frandulent use of the mails. Theft of mail. Hold-up and robbery Burglary of post office Mailing of obseene matter Embezzlement of official funds Money-order forgeries Letters of extortion Miscellaneous	837 850 142 498 140 284 206 233 538	831 670 133 475 109 263 194 (1)	636 778 93 473 90 24(174 16) 397
Total	3, 728	3, 273	3, 04

¹ Data not available.

Of the 3,728 criminal prosecutions instituted by arrest during the year, all were concluded by June 30 except 854. The proceedings resulted as follows:

	2, 467
Convicted	349
Proceedings dismissed	
Tried and acquitted	51
	7
Died awaiting trial	854
Pending	
	2 798

Fotal______ 3, 728

During the fiscal year ended June 30, 1933, 3,728 arrests were made for violations of the postal laws. The progress made in dis-

posing of these cases may be seen from the following statement of their status on the first day of each succeeding fiscal year:

	Status as of—		
	July 1, 1933	July 1, 1934	
Convicted	2, 453 294 65 10 906	2, 917 481 106 14 210	
Total	3,728	3, 728	

There was a substantial increase over the preceding fiscal year in the number of major postal robberies and thefts and a decrease in minor robberies and thefts as shown in the table below. The more important robberies and thefts increased from 16 to 24 and the minor robberies decreased from 305 to 202.

Robberies and thefts involving losses of \$5,000 or more

	Number of cases	Amount stolen
1932	9 16 24	\$167, 173, 82 789, 228, 92 509, 687, 97
Other robberies		
1932	263 305 202	\$20, 983. 01 25, 826. 31 35, 084. 07

BUREAU OF ACCOUNTS

Last year the Bureau of Accounts, under the Comptroller of the Post Office Department, reported the completion of a uniform accounting plan for all postmasters and that the new methods were in operation at 46,506 (as of July 1, 1934) post offices in this country, in Alaska, Hawaii, Samoa, Guam, Puerto Rico, and the Virgin Islands.

Monthly reports of postal revenues and expenditures are now secured from all first- and second-class offices, which enables the quick compilation of information in the Department showing income and expense as reported by postmasters. Therefore, for the first time in the history of the Postal Service, the executives of the Department are furnished with current information relative to fiscal affairs. For example, on October 20, 1934, it was possible to state the receipts and disbursements classified by States and by appropriations for the first

quarter of the fiscal year 1935.

The quarterly postal and monthly money-order accounts of firstand second-class postmasters are rendered direct to the Department for administrative examination in the Bureau of Accounts prior to submission to the General Accounting Office. During the year, 15,636 postal accounts and 46,908 money-order accounts received the prescribed administrative examination. The accounts of third- and fourth-class postmasters, combining postal and money order business, are forwarded to the central accounting postmasters for administrative examination and transmittal to the General Accounting Office by the Department. The number of district office accounts submitted during the year was 170,392.

Following is a statement showing the audited fiscal postal statistics. detailed and classified according to source of revenue and object of expenditure. It also shows the gross audited deficit, the credits for nonpostal items and other adjustments. It shows the income and expenditure of 10 years ago and for the years 1930, 1931, 1932, 1933,

and 1934.

	1924	1930	1931	1932	1933	1934

Deducted.

² Surplus.

It will be seen from the above that in the column for 1934 we have arrived at our surplus through the same formula of accounting procedure as brought out the deficits of previous years. In furtherance of a correct statement of the financial result from the conduct of the service of the mails for the public, eliminating all consideration of free mail and subsidies, and also in order to measure the sufficiency of the postage rate charged, it is necessary to adjust the gross difference between revenues and expenditures from all sources. In reporting a surplus of \$12,161,415.03, the Department has accomplished this result through the following adjustments.

The prior-current item is the elimination of expense applying to 1933 and 1932, and bringing in obligations for 1934, incurred but unpaid. The item of Shipping Board ocean mail is a charge to postal expenses of an ocean-mail contract which was let during the year and administered by us from funds transferred from the Shipping Board. The item of public buildings is the amount chargeable to the Postal Service from the expenditures for public buildings; the cost of occupancy by other Government departments and agencies is charged to general expense by the Comptroller General. The general fund item for 1924 is the adjustment of payments to the retirement fund applicable to the Postal Service, and since then absorbed in the regular expense.

It will also be seen that the credits provided for in the act of June 9, 1930, have been on the same basis each year. The variance in the amounts reflects the increased postage rate and the increased free mail volume from Government departments. The decrease in airmail subsidy for the fiscal year 1934 is due to a downward revision of airmail contracts early in the year and prior to the reletting of the present new contracts which made a further saving but only applied during the last few weeks of the fiscal year. The increase in ocean mail subsidy is due to the provisions of the long-termed contracts under which this service is performed.

BUDGET OFFICER

The Comptroller has been designated to act as Budget officer for the Department. In that capacity he supervises the preparation of Budget estimates, makes proper allocations and allotments of the several appropriations, and is the contact officer of the Department with the Director of the Bureau of the Budget.

RETIREMENT RECORDS

The record of individual deductions from salaries of postal employees subject to retirement, inaugurated in March 1930, was carried on to a satisfactory conclusion by the end of the year. Difficulties were encountered in obtaining correct reports from post offices, many of whose records were not complete. However, the final results obtained were reasonably accurate and enabled this office to make its report to the Civil Service Commission for the purpose of computing actuarial data and for other administrative information.

Records are maintained of individual postal employees to the number of 221,481, to whose collective credit there stood in the civil service retirement and disability fund on June 30, 1934, the sum of \$129,360,253.72, not including interest.

During the present fiscal year, 6,786 custodial employees with a net retirement credit of \$1,385,794.29 were transferred from the Treasury to the Post Office Department.

OFFICE OF THE PURCHASING AGENT

This office is charged with the purchase of all supplies, both for the Post Office Department proper and for all branches of the Postal Service. The purchasing agent prepares the advertisements and forms for proposals necessary to the making of contracts, enters into contracts for such supplies for the Postmaster General, issues orders to contractors, and passes upon the propriety of allowances to postmasters to cover emergency purchases. The purchasing agent also enters into contracts for the Postmaster General for envelops for the departments and independent establishments of the Government.

On October 1, 1933, the administration of Federal post-office buildings was transferred from the Treasury Department to the Post Office Department. It became necessary to purchase large quantities of supplies for these buildings, which has resulted in much additional work and responsibility for this office. The number of contracts and orders has increased very materially, as shown in this report.

CONTRACTS

During the fiscal year ended June 30, 1934, 1,907 contracts were entered into for the purchase of supplies, 116 of which were formal and 1,791 of which were open-market or circular-proposal contracts. This is an increase of 31 percent, as compared with 1,458 contracts for the previous fiscal year, which is due largely to the additional work occasioned by the transfer of the administration of Federal post-office buildings to the Post Office Department.

EXPENDITURES

The sum of \$6,608,655.65 was expended by the Post Office Department on orders for supplies placed by the purchasing agent and on postmasters' authorizations approved by the purchasing agent during the fiscal year.

These expenditures were apportioned among the various bureaus of the Department as follows:

Second Assistant, Division of Railway Mail Service	5	87, 8	390.	66
Third Assistant, Division of Stamps	3, 21	19, 8	341.	90
Fourth Assistant:				
Equipment and supplies branch	2, 16	34, 0	31.	57
Maintenance branch	88	37, 3	396.	81
Manufacturing and repair branch	24	14, 6	646.	73
Chief Clerk		34, 8	347.	98
	-	-	-	-
m + 1	6 60	10 6	SEE	65

In handling the business covered by the amount named it was necessary to draw 14,196 orders on contractors, as compared with 8,636 for the previous fiscal year—an increase of 64 percent, which is due largely to the additional work occasioned by the transfer of the administration of Federal post-office buildings to the Post Office Department. The orders covered supplies for the different bureaus of the department as follows:

Second Assistant Postmaster General	1	64
Third Assistant Postmaster General	1, 1	71
Fourth Assistant Postmaster General	11, 0	146
Chief Clerk	1, 8	15
		-
Total	14, 1	96

ENVELOPS

The schedule of envelops for the departments of the Government, which the Postmaster General is required to contract for under the law, contained 69 items, calling for approximately 12,361,000 plain envelops and 243,400,500 printed envelops—a total of approximately 255,761,500 envelops. This estimated quantity was approximately 13,466,000 envelops less than were estimated for the previous fiscal year. Due to the increase in the cost of kraft and white paper prices were slightly higher than during the previous year.

For use in handling correspondence in the Postal Service 114,413,-420 official envelops and registered package jackets were purchased,

amounting to \$92,254.04.

Following are the principal items purchased during the year:

Item	Cost
1,625 small-size letter boxes	\$5, 222. 51
500 large-size letter boxes	
1,500 large collection boxes	
3,800 letter-box fasteners	
1,000 letter-box posts	1, 499. 40
1 conveyor	2, 157. 00
60 time recorders	2, 652. 21
234 safes	41, 561. 85
Blinds and shades	93, 369. 42
5,115 tires	29, 167. 36
6.174 tubes	O FOR OH
Gasoline	725, 024. 17
245.023 gallons of oil	42, 294. 67
43,176 pounds of grease	1, 205. 38
1.208.500 tags	1, 768. 60
178 typewriters	11, 660. 00
99 adding machines	14, 493. 60
6 dictating machines	
3 mimeographs	423. 00
191,120,000 tabulating cards	107, 346. 93
Furniture and screen line	694, 973. 76

Item

Paper of various kinds (blueprint, newsprint, toilet, white and col-		
ored sulphite bond, mimeograph, manifold, carbon, wrapping, blot-	Cost	
ting, book, cards, plain facing slips, paper tape, etc.)	\$111, 011. 7	6
860,703 pounds of twine	120, 938. 8	
294 platform trucks	14, 303, 7	5

By taking advantage of discounts offered for the prompt settlement of accounts the sum of \$16,255.15 was conserved in favor of the Department's appropriations.

As has been shown in annual reports in the past, the only saving credited directly to the purchasing agent's office is the taking of cash discounts. Due largely to the fact that many of the codes of the National Recovery Administration prohibit time discounts, the amount of discounts shown for the past fiscal year is very much smaller than preceding years. It is the claim of the purchasing agent that this item is not a saving but merely one of the routine duties of the office. The discounts are an integral part of the original bid of the successful contractor. A real saving is being effected only by applying hard and fast business methods to purchases. Actual savings to the Post Office Department cannot be shown in even approximate figures. The purchasing agent, by taking advantage of seasonal price changes, by securing wide competition, by substituting, with the approval of the requisitioning bureau, lower-priced products, by readvertising when prices quoted are considered too high, is saving much money and the actual saving appears in the conservation of appropriations.

APPENDIX

Following is a statement of the audited revenues and expenditures of the Postal Service for the fiscal year 1934 as compared with the year preceding.

 ${\it Table 1.--Comparison of revenues and expenditures for the fiscal year ended June 30, } \\ 1934, \ with those of the preceding year$

Items	Fiscal year

 $^{^{14}}$ \$900 transferred to contingent expenses, telegraphing.

Taking into account the payments made during the fiscal year on account of undischarged obligations carried over from previous fiscal years and undischarged obligations incurred for the service of the fiscal year 1934, the deficit is as follows:

Expenditures during the fiscal year (including \$34,066.84 adjusted losses and contingencies, postal funds)	\$630, 767, 000, 66
Less payments on account of undischarged obligations carried over from previous fiscal years.	20, 070, 594. 23
Expenditures during the fiscal year applying to the service of the year Obligations for 1934 outstanding June 30, 1934	610, 696, 406. 43 22, 704, 158. 18
Total expenditures and undischarged liabilities chargeable to fiscal year 1934	633, 400, 564, 61 586, 733, 165, 80
Operating deficit. Adjustments for extraordinary expenditures (act of June 9, 1930): Revenue credits. \$24, 937, 761. 00 Expense credits 41, 685, 368. 83 \$66, 623, 129, 83	46, 667, 398. 81
Adjustments for General Fund expenditures: \$5,485,981.82 Shipping Board \$2,303,334.17 7,794,315.96	
Net adjustments	58, 828, 813, 84
Net postal surplus	12, 161, 415. 03

The figures for the previous 9 years (but excluding the revenue credits for free mail and the extraordinary expenditures under the act of June 9, 1930, and general fund expenditures as above) reconstructed in the same manner show the following comparisons:

Fiscal year	Postal revenues	Expenditures, obligations, and losses	Operating deficit	Cost of opera- tions per mil- lion dollars' revenue
1025 1926 1927 1927 1928 1929	\$599, 591, 477, 59 659, 819, 801, 08 683, 121, 988, 66 693, 633, 921, 45 696, 947, 577, 69	\$648, 347, 504, 61 708, 784, 714, 62 725, 071, 949, 51 740, 328, 432, 73 782, 146, 498, 02	\$48, 756, 027. 02 48, 964, 913. 54 41, 949, 960. 85 46, 694, 511. 28 85, 198, 920. 33	\$1, 081, 315, 41 1, 074, 209, 52 1, 061, 409, 17 1, 067, 318, 66 1, 122, 245, 80

 $\begin{array}{c} {\rm Table\ 14.} - Summary\ of\ transactions\ in\ stamped\ paper\ and\ internal\ revenue-stamps} \\ during\ the\ fiscal\ year\ 1934 \end{array}$

Item	Postage stamps	Internal-revenue stamps
Stamp stock on hand in post offices July 1, 1933	\$284, 179, 088. 85 461, 137, 136. 29 4, 099, 117. 21	\$2, 820, 594. 91 2, 661, 640. 00 33, 201. 00
Total	749, 415, 342. 35	5, 515, 435, 91
Stamp stock sold by postmasters July 1, 1933, to June 30, 1934 ¹ . Stamp stock redeemed by Department from postmasters. International reply coupons redeemed. Dead-letter bills.	449, 854, 405. 37 4, 442, 217. 27 1, 768. 74 3, 367. 95	2, 349, 095. 78 2, 282. 46
Stamp stock transferred to post offices. Decrease in price of stamped envelops. Miscellaneous adjustments. Stamp stock on hand in post offices June 30, 1934.	4, 106, 117. 21 34. 55 4, 975. 69 291, 002, 455. 57	33, 201. 00
Total	749, 415, 342. 35	5, 515, 435. 91

¹The difference between the postage-stamp sales reported above and those reported by the General Accounting Office is due to the excess revenue gained from the sale of stamped envelops and newspaper wrappers, credits on account of losses by fire, burglary, etc., and to miscellaneous adjustments, which are included in postmasters' postal accounts and not in their stamp accounts.

Table 38.—Statement showing the number of star routes in operation June 30, 1934, by contract sections, and the annual rate of cost for operating the service in each section

	Number of routes	Annual rate of cost of regular contract service
First contract section Second contract section Third contract section Fourth contract section	3, 050 2, 381 2, 008 4, 798	\$2, 556, 693. 15 1, 647, 388. 86 2, 049, 684. 94 6, 534, 217. 77
Total	12, 237	1 12, 787, 984. 72

¹ Does not include the additional cost for the transportation of excess mail over 176 routes on a pound-rate basis, the total cost of which for the fiscal year 1934 was approximately \$21,920, nor of the Government-operated star-route service, which cost approximately \$90,000, nor for temporary star-route service, which cost approximately \$42,329 during the year.

The following statement shows cost of the service under old contracts in the fourth section as of June 30, 1934, and the annual rate of cost of the service in that section under the new contracts beginning July 1, 1934.

Annual rate of cost of service under old contracts. \$6,534,217.77

Annual rate of cost of service under new contracts. \$4,876,765.98

The cost per mile of travel under the new contracts is 7.21 cents, or a decrease of 2.34 cents per mile of travel under the cost per mile for the old contract period.

Table 39.—Statement showing the growth of the Rural Delivery Service, by years since its inception, and the expenditure involved

Apparent discrepancies between the figures in this column and in the corresponding column headed Carriers" in previous annual reports are due to having been taken for periods other than fiscal years.

Maximum salary of carriers increased from \$600 to \$720 per annum.

Maximum salary of carriers increased from \$720 to \$900 per annum.

Maximum salary of carriers increased from \$900 to \$1,000 per annum.

Maximum salary of carriers increased from \$1,000 to \$1,100 per annum.

6 Maximum salary of carriers increased from \$1,100 to \$1,200 per annum.

Table 39 .- Statement showing the growth of the Rural Delivery Service, by years since its inception, and the expenditure involved—Continued

7 Decrease.

8 Increase of 20 percent in salary of carrier, plus allowance of \$24 a mile or major fraction thereof over 24 miles.

- 24 miles.

 * Such additional appropriation as is necessary to cover increase to \$1,700 to be added to this amount.

 * Such additional allowance of \$200 per annum under Joint Resolution 151, approved Nov. 9, 1919, making salary for standard route of 24 miles \$1,700 per annum.

 * Such additional appropriation as is necessary to cover increase to \$1,800 to be added to this amount.

 * Salary for standard route of 24 miles increased to \$1,800 per annum.

 * Additional sum of \$5,880,751.19 of appropriation for 1926 expended for equipment maintenance under provisions act of Feb. 28, 1925.

 * Additional appropriation of \$20,977,402.73 for equipment maintenance, with \$350,000 of the appropriation for 1927, made available for use in the fiscal year 1926.

 * Decrease in number of routes due to consolidations made as vacancies in the carrier force have occurred, but with no diminution in the facilities afforded patrons.
